

Smart Maintenance Tools

Maintenance & hydraulic tools for bearings and transmission parts

Maintenance and hydraulic tools for bearings and transmission parts

Schaeffler Smart Maintenance Tools is a manufacturer and distributor of special tools with its own brand name: BETEX®. BETEX® products ensure safe, cost-effective fitting and removal of bearings and drive components, etc. These tools are used in production and maintenance departments at MRO and OEM companies worldwide.

Dealer network

We export through a global network of distributors and supply various types of industries. For further information and details of a nearby dealer, please contact: sales.smt@schaeffler.com

Schaeffler Smart Maintenance Tools is supplier of:

BETEX® induction heaters

Mounting & Dismounting

Why use induction heating?

Induction heating is a superior, fast and controlled method. It is a safe and environmentally-friendly alternative to traditional heating methods such as ovens, oil baths or blow torches. These methods not only generate smoke and fumes, but also cause burning of necessary lubricating greases and damage to rollers due to uncontrolled and localised overheating. This makes them hazardous for your personal safety and a healthy working environment.

It is common knowledge that a correct mounting method extends the bearing life. Controlled stress-free heating prevents unnecessary damage, while retaining the original bearing lubrication. Ideal for sealed

bearings (2RS-ZZ). Bearing manufacturers recommend controlled induction heating as the best practice for bearing mounting.

Multifunctional, for mounting and dismounting

We offer solutions for Mounting (low-frequency) and Dismounting (medium-frequency). For bearings, gear wheels, bushings, couplings, etc.

Controlled heating Temperature and/or time

Smart electronics ensure optimum control during the heating process. These automatically regulate the most efficient use of power and ensure even and rapid heating. No extra steps are necessary. Explosive heating is impossible (no discolouration or pitting of material).

Demagnetization

Reliable demagnetization is very important for bearings and transmission parts. The proven quality of BETEX® induction heaters guarantees maximum demagnetization ($<2A/cm$). This has a positive impact on the service life of bearings and gears and the like.

Energy efficient

All BETEX® induction heaters are energy efficient in comparison with traditional methods.

New generation with smart technology

The heating process is displayed in a clear graph on a touchscreen. There is a log function to save or export data. A work log can be created as evidence. Thanks to the double temperature sensor it is possible to heat stress-free with preset values (ΔT).

For more control and stress-free mounting

Thanks to the ΔT monitoring, it is possible to measure the internal and external temperature of a workpiece with 2 temperature probes. Thus the maximum preset temperature difference between 2 points can never be exceeded. This achieves even and uniform heating and prevents unnecessary material stress.

Delta T

Operating principle

The heater works by inducing a (low-frequency) current in the workpiece to be heated. This is achieved by incorporating the workpiece as a secondary winding in a transformer. The primary winding is connected to the mains power by means of an electronic control. The magnetic field induces a high current (short-circuit current) through the workpiece, which consequently becomes hot. The workpiece is automatically demagnetized after each heating cycle.

Difference between low- and medium-frequency

- Low-frequency: slow heating, great heat penetration depth
- Medium-frequency: fast heating, shallow heat penetration depth

Heating times are subject to the relationship between:

- Dimensions and weight
- Temperature and material
- Available power

Dutch design

Schaeffler develops, manufactures and sells BETEX® induction heaters for professional use within industry and services sectors. Our induction heaters are used around the world, are reliable and user friendly.

Advantages of BETEX® induction heaters

- ✓ Safety for both the user and the component to be heated
- ✓ For mounting and dismounting
- ✓ Environmentally friendly: no smoke, no open flames, no fumes, no oil waste
- ✓ The energy saving alternative to traditional methods
- ✓ Robust design for use in industrial environments
- ✓ For sealed (2RS-ZZ) and pre-lubricated bearings
- ✓ Automatic power reduction
- ✓ Automatic demagnetization to $\lt; 2A/cm$
- ✓ Automatic reheat mode
- ✓ User-friendly swivel arm construction
- ✓ Designed for MRO and OEM departments
- ✓ 3-year warranty on electronic unit

Custom made

Schaeffler has realised many projects aimed at optimising production processes and increasing production capacity. For serial heating or heating of non-standard shapes.

Read more in the “Sometimes customisation is the best solution” starting on page 186.

All heaters are supplied with:

- Instruction manual
- Heat-resistant gloves 250°C / 482 °F
- Magnetic temperature probe (240°C / 464 °F)
- Vaseline for maintenance

Dependable quality

BETEX® induction heaters are proven to be reliable. Their sturdy styling and user-friendly design guarantees uninterrupted, problem-free operation in an industrial environment.

Service & Warranty

Our expertise and experience ensure quality, reliability, professional advice and outstanding service. BETEX® induction heaters are supplied with clear instructions and a 3-year warranty on the electronic components.

Electric heaters

BETEX Cone Heater, CH series

BETEX Cone Heater

For the heating of bearings, enabling easy mounting by means of shrinkage fitting.

Using the correct mounting method extends the bearing's service life. Electric heating is a safe alternative to traditional methods such as hammering, oil baths or blow torches. Suitable for the heating of gear wheels, bushings, couplings and other round metal workpieces.

The affordable alternative!

If your budget is limited, the BETEX Cone Heater is an affordable alternative to other heating systems. Easy to use and suitable for various sizes. In a lightweight aluminium housing. For quick and even heating.

Models with thermometer (CHC)

- Temperature control: with temperature preset to 120°C / 248 °F
- Thermostat feature: the unit will keep the bearing at a preset temperature

Advantages:

- ✓ Easy to use, just plug it in and switch it on
- ✓ Lightweight making it easier to move around
- ✓ Reliable and flexible
- ✓ Safe and clean operation
- ✓ Intermediate sizes also fit

Induction heaters

BETEX iDuctor 1 & 2 – hand tools

Supplied with case

Both devices are supplied in a handy plastic case, incl. a 2.0-metre flexible inductor, a 2.5-metre power cord, heat-resistant gloves (250°C) and an instruction manual.

BETEX iDuctor 1 & 2

The BETEX iDuctor is a small-sized professional hand tool for medium-frequency heating technology. This means it is a safe and clean method, free of open flames, that is perfect for use in workshops and on location.

BETEX iDuctors are the ultimate precision heating tool to loosen stuck parts (nuts, bolts, bearings). All sorts of metal parts, such as transmission parts, bearing housings, bolts, nuts, pipes and small surfaces can be heated locally. Thanks to the precise heating, the surroundings retain a normal temperature. As a result, stuck parts will expand and loosen, rust and sealants dissolve. The choice in inductors makes it a multipurpose tool which can be used for mounting, dismantling or preheating. Even for removal of decals, coating layers or paint residue from steel.

There are two types of iDuctor:

- The iDuctor 1 has a capacity of 1200 W.
- The more powerful iDuctor 2, with outputs of 2000 W and 2300 W, is more suitable for larger and heavier parts.

Read more about iDuctor accessories on page 10.

Advantages

- ✓ Heats extremely fast
- ✓ Additional inductors available
- ✓ Ergonomic design
- ✓ Time and Cost saving
- ✓ Can be operated with one hand
- ✓ No open flames
- ✓ Safe to use
- ✓ Multipurpose
- ✓ Suitable for difficult to access locations
- ✓ Maintenance free

Induction heaters

BETEX iDuctor accessories

Flexible inductors and accessories

Flexible inductors can be placed in or around a workpiece. Therefore, they are ideal for a large variety of parts.

1. Flexible inductor
2. ID-pad for local surface heating for removing decals, coating layers, paint residue etc. from steel.

Type	Art. no.	Wire thickness mm	Length mm	Temp. isolation °C (°F)
Flexible Inductor 1.1 mtr	231202	3.5	1100	650 (1202)
Flexible Inductor 2.0 mtr	231203	3.5	2000	650 (1202)
Flexible Inductor 2.5 mtr	231217	3.5	2500	650 (1202)
Flexible Inductor 3.0 mtr	231218	3.5	3000	650 (1202)
Flexible Inductor 3.5 mtr	231219	3.5	3500	650 (1202)
ID-pad	231205	3.5	-	150 (302)
Heat protective gloves (up to 250°C)	279998	-	-	250 (482)
Heat protective gloves (up to 300°C)	279992	-	-	300 (572)

Flexible inductors with a length of more than 2 metres are mainly used for larger and heavier components that require correspondingly higher power. We therefore recommend combining it with the iDuctor 2 variants with an output of 2000 W or 2300 W.

iDuctor 1 set

Set of nine inductors consisting of different bolt sizes and a flexible U-inductor for the iDuctor 1 variants.

BETEX SLF 302

- Benchtop model, heating capacity up to 100 kg
- With swivel arm
- Double temperature measurement ΔT
- Touchscreen with clear graph
- Log function and export to USB stick
- Stress-free heating
- 2 yokes included (See page 34)

For more control and stress-free mounting

Thanks to the Delta-T ΔT monitoring, it is possible to measure the internal and external temperature of a workpiece with 2 temperature probes. Thus the maximum preset temperature difference between 2 points can never be exceeded. This achieves even and uniform heating and prevents material stress.

Log function and export to USB stick (not included)

Recommended horizontal heating position

Ergonomically designed swing arm

Induction heaters

BETEX MF Quick-Heaters - medium-frequency technology

Mounting, dismantling and preheating of metal components

Induction generators with medium-frequency technology are suitable not only for thermal assembly, but also for disassembly. Medium-frequency technology effectively transfers energy to the workpiece, allowing it to heat up easily and quickly. The BETEX MF Quick-Heater consists of a generator with a fixed or flexible inductor. Its compact dimensions make it easy to move around.

BETEX MF Quick-Heaters result in time savings as they can be deployed very rapidly (fewer actions) and heat faster than conventional methods. Energy use is much more efficient thanks to its lower power consumption. One of the major advantages of this type of induction heater is that they are not limited to components with a cylindrical shape: flexible inductors can be wound around any size or shape. This makes it possible to heat very large and heavy components.

Advantages of BETEX MF Quick-Heaters

- ✓ For mounting, dismantling and preheating
- ✓ Suitable for steel, cast iron, stainless steel and titanium
- ✓ Temperature and/or time controlled heating
- ✓ Double temperature measurement (ΔT monitoring)
- ✓ Low connection power (32/63 Amp)
- ✓ Generators are adjustable from 2.5 to 3.5/10/22/44 kW
- ✓ Easy to use and flexible
- ✓ Suitable for production and maintenance applications
- ✓ No residual magnetism
- ✓ No fire hazard due to open flames
- ✓ No noise, fumes or smoke nuisance
- ✓ Air-cooled: no water cooling needed
- ✓ Because the work is carried out damage-free, expensive components can be reused
- ✓ A flexible or fixed inductor is recommended depending on the application

To be used for

- Bearings
- Labyrinth rings
- Bearing rings
- Bearing housings
- Gear wheels
- Rollers
- Tubes
- Bushings
- Couplings
- Train wheels/train wheel tyres
- Extruders
- Stator housings

The BETEX MF Quick-Heater

This heater consists of a generator and one or more inductors. The generator is designed for the connection of inductors used for heating ferromagnetic workpieces. Suitable materials include iron, steel, stainless steel, titanium and certain bronze alloys. The maximum capacity workpieces can be subjected to is 3.5, 10, 22 or 44 kW depending on the type of heater.

Operating principle

The three-phase voltage is rectified and smoothed. This rectified voltage is then converted by means of an inverter into an AC voltage with a frequency between 10 and 25 kHz. The power is then

applied to the workpiece magnetically via a 'resonance capacitor' using an inductor (coil).

Since the frequency is relatively high, the penetration depth of the magnetic field is not too large, so that only the outer layer of the workpiece is heated. This principle makes heating using medium-frequency particularly suitable for dismantling purposes, such as removing bearing rings from shafts.

Testing

For special applications, we can carry out tests in advance with components that the client provides for this purpose.

Custom made

If necessary, we can supply a customised application. For standard applications, we have a large database with examples. We also use simulation programmes.

Savings

By supplying optimum solutions, we achieve significant savings. In fact, measurable savings are guaranteed simply by working damage-free and hence, being able to reuse the parts.

Induction heaters

Medium-frequency heating methods

Fixed inductor around the workpiece

Energy input from outside to inside. For dismounting of, for example, bearing rings, labyrinth rings, pipes and rings.

Fixed inductor in the workpiece

Heating a bore for bearing or shaft mounting.

Fixed inductor in and around the workpiece

For stress-free mounting of a bearing, two coupled generators are used. Inner and outer ring are heated simultaneously.

Pin inductor in the workpiece

Heating a bore for example for bearing or shaft mounting.

Table inductor

Local preheating for laser cladding.

Induction heaters

Medium-frequency projects

BETEX MF Quick-Heater 3.0, 22 kW
Mounting of wheels in an elevator plant using pin inductors. For this client, custom inductors were made, with the required lengths and diameters.

BETEX MF Quick-Heater 3.0, 22 kW
Dismounting in a steel plant using a flexible inductor wrapped around a bearing ring.

Temperature: 200°C
Time needed: 17 min.

BETEX MF Quick-Heater 3.0, 44 kW
Dismounting of a coupling at a gearbox repair company.

Temperature: 100°C
Time needed: 7 min.

BETEX MF Quick-Heater 3.0, 22 kW
Preheating in preparation for laser cladding.

Induction heaters

BETEX MF Quick-Heater 3.0 - 3.5kW

New

3.5
power kW

4,3"

BETEX MF Quick-Heater 3.0 - 3.5kW

- Portable induction heater, weighs only 7.85 kg, ideal for working on site.
- Easy to connect to mains voltage (230V)
- Easy operation with 4,3" touchscreen
- Smart electronics ensure optimal operating frequency
- Dual temperature sensing (monitoring Delta T)
- Choice of flexible inductors: 5m, 7.5m, 10m (not included)
- Can heat according to preset temperature/time curve
- The heating process is displayed in a clear graph
- Log function to save and export data via a USB port

For more control and stress-free mounting

Thanks to the Delta-T ΔT monitoring, it is possible to measure the internal and external temperature of a workpiece with 2 temperature probes. Thus the maximum preset temperature difference between 2 points can never be exceeded. This achieves even and uniform heating and prevents material stress.

SMART inductor recognition

The desired temperature and desired power do not have to be set if an inductor with SMART identification feature is connected. In this case the generator automatically adopts the settings defined in the program (1, 2 or 3) for the corresponding inductor.

BETEX MF Quick-Heater 3.0 - 10 kW

- Compact design with 7" display
- User-friendly touchscreen operation
- Smart electronics ensure optimum operating frequency
- Adjustable power regulation

SMART inductor recognition

The desired temperature and desired power do not have to be set if an inductor with SMART identification feature is connected. In this case the generator automatically adopts the settings defined in the program (1, 2 or 3) for the corresponding inductor.

BETEX MF Quick-Heater 3.0 - 22kW

- Compact design with 7" display
- User-friendly touchscreen operation
- Smart electronics ensure optimum operating frequency
- Adjustable power regulation
- Double temperature measurement (ΔT monitoring)
- Choice between fixed and flexible inductors
- Can heat according to preset temperature/time curve
- The heating process is displayed in a clear graph
- Log function to save and export data via a USB port

For more control and stress-free mounting

Thanks to the Delta-T ΔT monitoring, it is possible to measure the internal and external temperature of a workpiece with 2 temperature probes. Thus the maximum preset temperature difference between 2 points can never be exceeded. This achieves even and uniform heating and prevents material stress.

The MF 3.0 features a 7-inch touchscreen

Optional signal tower for MF 2.5 and 3.0

Induction heaters

Fixed inductors

This type is mainly used for workpieces of the same design that occur frequently and need to be heated. It is also frequently used for relatively small workpieces where a flexible inductor is not sufficient. The versions can vary from an inductor that heats the workpiece from inside a bore to a variant that heats the workpiece from the outside.

Fixed inductors are custom-made and basically suitable for 1 type of workpiece. If the dimensions of several workpieces are very similar, it is sometimes possible to use 1 inductor for several workpieces. Fixed inductors are generally equipped with inductor recognition and overheating protection.

Standard-sized fixed inductors

For specific applications in the rail industry, we have standard fixed inductors in our range. These fit the job perfectly and can be used in repetitive production.

SMART inductor recognition

The desired temperature and desired power do not have to be set if an inductor with SMART identification feature is connected. In this case the generator automatically adopts the settings defined in the program (1, 2 or 3) for the corresponding inductor.

Standard railway inductor type	Art. no.	Boring Ø mm	Width mm	Max. power kW	Max. temperature
Fixed inductor labyrinth	350200900	202	90	22	180 °C / 356 °F
Fixed inductor innering	350200902	171	150	22	150 °C / 302 °F
Fixed inductor labyrinth	350200903	177	90	22	180 °C / 356 °F

Other sizes can be ordered custom-made.

Induction heaters

Flexible inductors

Flexible inductors can be placed in or around a workpiece. Therefore, they are ideal for a large variety of parts. From large inner rings to very large components such as gear wheels and housings.

- Different cable lengths, temperature and power ratings are available. Thanks to their flexibility, a wide range of applications is possible.
- Flexible inductors are used to wrap a number of windings around, inside (bore) or on a workpiece (as a flat coil on a surface).
- Flexible inductors are meant to be used with BETEX medium-frequency generators. Make sure the capacity of the inductor corresponds with the capacity of the generator.

Caged flexible inductors

In this case, a flexible inductor is wrapped in a cage. This provides a lightweight construction that allows serial heating of a repetitive size. Often this solution is a lighter alternative to a comparable fixed inductor.

Magnetic holder

Optional: magnetic holders to secure the flexible inductors.

Fitting tool sets

BETEX Impact 33 & 39

Fast and accurate bearing mounting

The use of an Impact fitting tool set is of absolute importance for the safe, precise and fast mounting of bearings.

Specially for bearings it is important that during mechanical mounting the bearing is supported on its inner and outer ring in order to avoid unnecessary damage and premature failure.

When an Impact fitting tool set is used, mounting forces are not transmitted via balls or rollers of the bearings and hence the raceways are not damaged.

By using impact-resistant plastic collets (made of unbreakable sheet material, instead of easily breaking injection moulded collets), metal to metal contact is avoided, and therefore damage to the shaft is prevented.

IMPACT 33

- With 3 sleeves
- With 33 rings, suitable for \pm 375 different types of bearings.

Also for other machine components

The sets can be used for bore diameters from 10 to 60 mm or parts thereof. Mounting of other machine components such as bushings, sealing rings, gear wheels and pulleys can also be carried out safely, precisely and quickly using an Impact fitting tool set.

Use in combination with BETEX Induction heaters.

Your benefits:

- ✓ Safe, precise and quick mounting
- ✓ No more damage to shafts, bearing housings and bearing sealing rings
- ✓ Extended service life of bearings
- ✓ The impact-resistant plastic collets are made of unbreakable sheet material
- ✓ **The numbers of the collets are clearly engraved and coloured, so mistakes are impossible.**

IMPACT 39

- With 4 sleeves
- With 39 rings, suitable for ± 600 different types of bearings.

Type	Impact 33	Impact 39
Art. no.	399900-2	399900-4

Mechanical pullers

BETEX MSP 2/3-arm pullers, self-centering

250

Max. shaft length mm

440

Max. spread mm

Prevent damage to shafts and spindles using the “BETEX 625/630 shaft protectors” starting on page 65.

BETEX MSP

Safe and easy dismounting of bearings, couplings, rings, etc.

- Ergonomic design, easy to operate by one person.
- Practical!
Self-centering 2-arm or 3-arm puller, including locking. Easy to convert, can be used in any position.
- Safe!
The arms slide inwards or outwards simultaneously. Bending or deflecting is impossible.
- Economical!
2-arm or 3-arm puller combination, 2 pullers for the price of one.
- Strong!
The harder the pulling force, the tighter the jaws grip around the workpiece.

Advantages of unique self-centering pullers:

- ✓ The arms slide inwards or outwards simultaneously.
- ✓ Prevents damage to shaft and object being pulled.
- ✓ Can be operated by one person.
- ✓ Work efficiently and save time.

Mechanical pullers

BETEX MP20 mechanical 2-arm pullers

390

Max. shaft length mm

600

Max. spread mm

Prevent damage to shafts and spindles using the “BETEX 625/630 shaft protectors” starting on page 65.

BETEX MP20

This 2-arm puller is extremely well-suited to applications involving the extraction of bearings, rings, sprockets, couplings etc. The jaws are forged and therefore extra strong. Reversal of the arms makes internal dismantling also possible. The self-locking system guarantees that the arms will not deflect.

- External and internal puller
- 2-arms, reversible
- Self-locking
- Also available as set MP20000 with a display including 5 sizes: MP20080, MP20115L, MP20155, MP20195, MP20250

Mechanical pullers

BETEX MP25 universal 2-arm bearing puller

110

Max. shaft length mm

245

Max. spread mm

Prevent damage to shafts and spindles using the “BETEX 625/630 shaft protectors” starting on page 65.

BETEX MP25

These bearing pullers are particularly suitable for extracting bearings, bearing rings, gears, discs etc. for tight or difficult to reach areas. First lateral force is applied to grip the part with the sharp jaws. These grip on the radius of the outer ring. Due to the special construction, the arms cannot move during use. You prevent damage and save time.

- External puller
- 2-arms
- For tight spaces behind bearings
- Special jaw construction for extra strong grip

Type / Art. no.	Max. shaft length A mm	Spread B mm		C mm	R mm	Weight kg
		Min.	Max.			
MP25120	89	34	120	125	6	1,7
MP25245	110	59	245	155	6	4,8

Mechanical pullers

BETEX MP26 2-arm pullers, cross arms with tapered claws

160

Max. shaft length mm

125

Max. spread mm

Prevent damage to shafts and spindles using the “BETEX 625/630 shaft protectors” starting on page 65.

BETEX MP26

This puller is particularly suitable for extracting bearings, pinions, pulleys etc. for tight or difficult to reach areas.

- External puller
- 2-arms
- For a wider spread and depth, puller arms can be assembled in variable positions
- Easy to handle, cross arm puller

Type / Art. no.	Min. shaft length A mm	Min. spread B mm	Max. shaft length C mm	Max. spread D mm	Weight kg
MP26095	90	55	90	95	0,3
MP26125	125	80	160	125	1

Mechanical pullers

BETEX MP30 mechanical 2/3-arm pullers, self-centering

640

Max. shaft length mm

720

Max. spread mm

Prevent damage to shafts and spindles using the “BETEX 625/630 shaft protectors” starting on page 65.

BETEX MP30

The 2/3 arms of these pullers adjust themselves simultaneously and symmetrically, inwards, or outwards. Work efficient with perfect positioning of the arms. The arms cannot bend or deflect. The higher the pulling force, the tighter the grip of the arms.

These pullers are also available with extended arms for even larger capacity.

- External puller
- 2- or 3-arms
- Self-centering
- Available in 6 standard sizes
- Available in 3 sizes with extended arms

Advantages of unique self-centering pullers:

- ✓ The arms slide inwards or outwards simultaneously.
- ✓ Prevents damage to shaft and object being pulled.
- ✓ Can be operated by one person.
- ✓ Work efficiently and save time.

Mechanical pullers

BETEX MP40 4-arm ball bearing puller

239

Max. arm length mm

10 - 60

Shaft diameter mm

BETEX MP40

These four-arm bearing pullers have been specially developed to extract ball-bearings from casings and shafts simultaneously. For when there is no free space internally or externally. The arms grip the bearing between the inner- and outer ring. For extra grip and the desired leverage effect, a supplied ring can be used. The blue numbered bearings are dismantled without the ring.

Used for the 6000, 6200, 6300 and 6400 bearing series.

- Internal puller
- 4-arms
- Available as set MP40900 in handy case with 3 sizes: MP40100, MP40200, MP40300

Type / Art. no.	Arm no.	A mm	Bearing	Weight kg
MP40100	11	160	6000 - 6001 - 6002 - 6003 - 6200 - 16002 - 16003 - 16100 - 16101	1,3

MP40900 set				

The **green** numbered bearings are removed without the ring.

Mechanical pullers

BETEX MP50 expanders, counter supports and slide hammers

5-76

Min./Max. diameter mm

89

Max. depth expander mm

BETEX MP50

This special expander system has been developed to facilitate rapid and effective dismantling under difficult conditions, e.g., in 'blind holes'. The multiple adjustable jaws (up to 6) ensure the correct grip from behind the bearing. Deflection is impossible. The counter supports are universal, which means that the arms can be twisted in any direction to find the best point of pressure.

The larger types are equipped with a conical puller adapter in the expander, which prevents friction when tightening the screw. Bearings, bushings, seal rings etc. are extracted effortlessly.

- Internal puller combination
- Combine with sliding hammer or counter support
- Expanders MP50507 and MP50811 have no housing
- Also available in 7 different sets, including sliding hammer and/or counter support

BETEX MP50350

Used in combination with internal expander puller.

- Stroke of 250 mm
- Connection thread 1/2" UN20h

A major advantage of the slide hammer is that it can be used independently of any housing. No pressure points are required. After positioning the inner expander puller, the slide hammer is screwed on.

Mechanical pullers

BETEX MP60/65 bearing splitters and counter supports

680

Max. shaft length mm

300

Max. spread mm

Prevent damage to shafts and spindles using the “BETEX 625/630 shaft protectors” starting on page 65.

BETEX MP60/65

BETEX MP60/MP65 is constructed for the dismounting of hard-to-reach bearings and other parts, where there is insufficient space for grip with a puller. Suitable for multiple applications.

- External puller combination
- Available in 8 splitter sizes with matching counter supports
- Available separately or as set*
- Large spindles have retractable points

*The content of a set (combination of bearing splitters and counter supports) is stated in the art.no. of the set. For example: Set MP7 110 060 comprises Slide hammer MP65 110 and Bearing splitter MP60 060.

Mechanical pullers

BETEX KZZ Key Puller

BETEX KZZ

For professional removal of parallel keys

With the BETEX KZZ, you can easily remove keys from shafts of motors, pumps and all kinds of other applications in drive technology. For keys up to a width of 35 mm.

Safe!

Hammer and chisel are no longer needed.

Advantages

- ✓ Safe dismounting.
- ✓ Quick dismounting.
- ✓ No damage to shafts or keys due to perpendicular dismounting.
- ✓ Shafts remain straight.
- ✓ Saves time, labour and costs.
- ✓ Jaws are made from specially tempered steel.
- ✓ Threaded screws with left and right trapezoidal thread.

Easy to use

1. Turn both jaws (1) upwards or downwards with handwheel (A) until they are in line with the housing (2).
2. Use handwheel (B) to set the size of the key to be pulled, with ± 1 mm of play.
3. Turn handwheel (B) to screw both jaws hand-tight to the key.
4. Turn handwheel (A) to pull the key upwards perpendicularly.
5. Turn the jaws downwards with handwheel (A); use handwheel (B) to unscrew the key.

KZZ	4900011	35	2.2

Mechanical pullers

BETEX MP35 hydraulic mini press, 8 ton

8
capacity ton

5
Max. stroke mm

Prevent damage to shafts and spindles using the “BETEX 625/630 shaft protectors” starting on page 65.

BETEX MP35

This auxiliary tool is used to increase pressure for stuck parts. The hydraulic mini press is placed between the shaft and the spindle. It administers a 5 mm stroke; max pressing capacity is 8 tons. The impact loosens the stuck workpiece. This prevents overloading and wear on the spindles.

- Compatible with mechanical pullers
- Time-saving
- Prevents overload
- Protects spindles from bending
- Use for bearings, gears, sprockets, discs etc.

Type / Art. no.	A Ø mm	B Ø mm	C Ø mm	D mm	E mm	F mm	G mm	H mm	I Ø mm	J Ø mm	K	L	Weight kg

Mechanical pullers

BETEX 625/630 shaft protectors

BETEX 625/630

Shaft protector sets for shaft centers and hollow shafts

These shaft protectors are indispensable between shaft and bearing puller, when dismantling bearings, couplings, etc. There are 2 types, BETEX 625 for shaft protection and BETEX 630 for hollow shafts.

By using these pressure pieces you prevent:

- Damage to the center hole and screw
- Puller overload due to tilting

BETEX 625 consists of 6 pieces:

'D' min. = Ø 16 mm 'H' min. = Ø 16 mm
'D' max. = Ø 38 mm 'H' max. = Ø 19 mm

BETEX 630 'S' consists of 11 pieces

'Db' min. = Ø 19 mm 'Du' min. = Ø 25 mm
'Db' max. = Ø 51 mm 'Du' max. = Ø 64 mm

BETEX 630 'T' consists of 6 pieces

'Db' min. = Ø 54 mm 'Du' min. = Ø 67 mm
'Db' max. = Ø 76 mm 'Du' max. = Ø 89 mm

Hydraulic pullers

BETEX HP & HSP 2/3-arm pullers, with integrated pump and cylinder

Compact pullers for dismounting components such as bearings, bushings, wheels, couplings and pulleys

- The self-contained hydraulic pump saves space, as you don't need a separate pump, hose or cylinder.
- The stronger the pulling force, the tighter the jaws grip around the workpiece. Bending or deflecting is impossible.
- 2-arm or 3-arm puller combination, easy to convert.
- Integral safety release valve prevents overload and ensures that you never exceed the maximum force.
- The lightweight telescopic handle can be rotated 360°.
- Can be used in any position.
- Includes safety net/blanket, adapter(s) and shaft protector.
- In useful carrying case.
- HSP pullers are self-centering.

415

Max. shaft length mm

620

Max. spread mm

Use in combination with "BETEX Bearing Splitter" starting on page 72.

Advantages of unique self-centering pullers:

- ✓ The arms slide inwards or outwards simultaneously.
- ✓ Prevents damage to shaft and object being pulled.
- ✓ Can be operated by one person.
- ✓ Work efficiently and save time.

Lightweight telescopic handle

HSP is self-centering

Hydraulic pullers

BETEX Tri-section Puller set

284
Max. shaft length mm

340
Max. spread mm

BETEX Tri-section puller set

- The complete hydraulic tri-section puller set is for safe and easy disassembly.
- The narrow plate edges enable the dismounting of hard-to-grip components.
- The Tri-section Plate is mounted behind the inner and outer bearing ring and prevents the pulling force from being transmitted through the moving parts, so the bearing is not damaged.
- Most parts are forged SCM440 alloy steel, creating a very safe and durable product.

This complete puller set is available in 4 capacities and consists of:

- Integrated pump and cylinder
- 360° adjustable handle
- Tri-section Plate
- Puller block
- Connection rods
- Steel storage case

Hydraulic pullers

BETEX HPP, 3-in-1 Push Puller, self-centering

Use in combination with “BETEX Bearing Splitter” starting on page 72.

BETEX HPP

With its 3-in-1 design, the BETEX HPP hydraulic puller is a tool for mounting and dismounting, including internal dismounting of bearings, wheels and rings.

- The BETEX HPP is suitable for both dismounting and mounting bearings. Mounting is possible by using the supplied screw adapter (bolt size M12-P1.75). It can easily be screwed into the shaft, causing the arms of the HPP puller to exert a pushing force against the inner ring of the bearing.
- The BETEX HPP has a puller specifically designed to dismount bearings via the inner ring. This makes it possible to dismount bearings that cannot be dismounted externally. In this case, the arms of the outer puller push against the workpiece.

Pulling externally

Mounting

Pulling internally

Practical example

User-friendly

- The special 3-in-1 design gives you one puller to easily fit or remove bearings, wheels and rings.
- The 3-arm design ensures an even and constant force when mounting and dismounting.
- Use the supplied extensions for longer shaft lengths.
- The arms of the self-centring inner puller shift inwards or outwards simultaneously, preventing slipping or deflecting.
- The BETEX HPP is equipped with an integrated pump and cylinder.

Safe

- The integrated safety relief valve guarantees user safety, and prevents damaging and overloading the BETEX HPP and workpiece. It also prevents the maximum pressure from being exceeded.
- Most parts are made of alloy steel, making the BETEX HPP a durable and safe product.

Cost savings

- The 3-in-1 design reduces preparation time, (dis)mounting time and working time.
- The BETEX HPP is ideal for mounting and dismounting a wide variety of parts such as rings, wheels, bearings, couplings and pulleys.

Type	Art. no.	Operations	Output tons	A mm	B mm	C mm	D mm	E	F mm	Weight kg

Accessory sets

BETEX Bearing Splitter

BETEX Bearing Splitter

Accessory sets for 4, 6, 8, 12 ton pullers HP, HSP, HXP, HPP.

This accessory set comprises:

- 1 Puller block
- 2 Sets of connection rods
- 2 Plates for min./max. \varnothing 12-225 mm

Use the pump/cylinder unit of the HP/HSP/HXP puller.

For the dismounting of hard-to-reach bearings and other parts, where there is insufficient space for grip with a puller. Suitable for multiple applications.

- Tri-Section 495: HP/HSP/HXP 203, 303

BETEX Tri-Section Plate

The Tri-Section Plate is specially designed for 3-arm (hydraulic) pullers.

The unique and patented design creates maximum spread and applies even force. The Tri-Section Plate can be mounted behind the inner and outer bearing ring. This prevents the pulling force from being transmitted through the moving parts, so the bearing is not damaged.

User friendly

- The unique design with hinge mechanism ensures maximum spread.
- Thanks to the Tri-Section Plate, the force is distributed evenly, so the bearing cannot bend or deform.
- Suitable for all 3-arm pullers.
- Available in a wide range, covering the most common shaft sizes.
- The Tri-section Plate consists of 4 different models suitable for shaft-mounted bearings from 26 to 495 mm.

Type	Art. no.	Cap. tons	Spread mm		B mm	C mm	D mm	E	F mm	G mm	H mm	Weight kg

Mobile hydraulic pullers

BETEX Mobipuller, hydraulic mobile puller

25
tons

50
tons

Double-acting electrical

Single-acting electrical

Single-acting manual

Option: adapters for inner rings, etc.

BETEX Mobipullers

For heavy-duty dismounting jobs. One person can do the job!

BETEX mobile hydraulic pulley puller quickly and easily removes machine parts such as bearings, couplings, bushings, gears, etc. The Mobipuller excels in functional and ergonomic handling. It is stable, mobile and adjustable in height. An operating pressure of up to 25 and 50 tons can be applied, at an opening of 430 mm. To ensure safe and easy operation, the electrical versions are supplied with remote control.

All models are equipped as standard with:

- Overload protection.
- Oil-filled pressure gauge.
- 4 adapters (extensions): 2 x Ø40 mm and 2 x Ø50 mm.
- 4 stable wheels with polyurethane tyres.
- 2 castor wheels with double-functioning brake.
- Safety cage.
- Dimensions LxWxH: 1570x990x1510 mm.
- The press frame can be extended in 2 steps of 190 mm each

Advantages

- ✓ Mobile
- ✓ Can be used when there is little space behind the workpiece
- ✓ One person can do the job
- ✓ Extra safe thanks to the safety cage

Mobile hydraulic puller

BETEX HXPC 2/3-arm puller, self-centering, with crane

50
tons

Valve block

Adapters

BETEX HXPC 50 2/3-arm

For dismantling of all kinds of transmission parts such as bearings, couplings, gear wheels, wheels, etc.

- The puller is self-centering, easy to manoeuvre and adjustable in height. The puller is easy to convert into a 2- or 3-arm version. The arms slide inwards or outwards simultaneously.
- The stronger the pulling force, the tighter the jaws grip around the workpiece. Bending or deflecting is impossible.
- Integral safety release valve prevents overload and ensures that you never exceed the maximum force.
- Can be used in any position.
- Remote control included.
- Safety blanket included.

Operation

- An electrohydraulic 230V-700 bar pump operates the cylinder and the crane. This is a 2-stage pump with an output of 2.8 litres per minute at 7 bar counter pressure.
- The design prevents the puller arms from slipping or deflecting from behind the workpiece.
- The crane has 2 castor wheels and 2 fixed wheels.
- A hydraulic single-acting cylinder with max. operating pressure of 700 bar (50 tons).
- The total stroke is 159 mm. Two adapters (extensions) are included, with a total length of 310 mm.

Also available without crane, HXP503 on page 68.

Advantages of unique self-centering pullers:

- ✓ The arms slide inwards or outwards simultaneously.
- ✓ Prevents damage to shaft and object being pulled.
- ✓ Can be operated by one person.
- ✓ Work efficiently and save time.

Mobile hydraulic puller

BETEX HXPM 50, 2-arm puller, self-centering

50
tons

Valve block

Adapters

BETEX HXPM 50 2-arm

For dismantling of all kinds of transmission parts such as bearings, couplings, gear wheels, wheels, etc.

- The puller is self-centering, easy to manoeuvre and adjustable in height. The arms slide inwards or outwards simultaneously.
- The stronger the pulling force, the tighter the jaws grip around the workpiece. Bending or deflecting is impossible.
- Integral safety release valve prevents overload and ensures that you never exceed the maximum force.
- Remote control included.
- 4 adapters included.
- Safety blanket included.

Operation

- Double-acting cylinder for clamping, opening and closing the arms, for a safe and secure grip on the workpiece.
- An electrohydraulic 230V-700 bar pump operates the cylinder and the height adjustment. This is a 2-stage pump with an output of 2.8 litres/minute at 7 bar counter pressure.
- The design prevents the puller arms from slipping or deflecting.
- The mobile frame has 2 castor wheels (with brake) and 2 fixed wheels.
- The hydraulic single-acting cylinder has max. operating pressure of 700 bar (50 tons).
- The total stroke is 330 mm. Four adapters (extensions) are included, with a total length of 620 mm.

Advantages of unique self-centering pullers:

- ✓ The arms slide inwards or outwards simultaneously.
- ✓ Prevents damage to shaft and object being pulled.
- ✓ Can be operated by one person.
- ✓ Work efficiently and save time.

Mobile hydraulic pullers

BETEX BPP & BPPS Side Shift Bearing Puller Pusher

100
tons

Step-by-step disassembly of TBU / SP / TAROL bearing sets

Step-by-step assembly of TBU / SP / TAROL bearing set

BETEX BPP & BPPS Side Shift

For mounting and dismounting of rail and metro bearing sets.

Specially for rail and metro workshops. Use the right equipment to remove or install tapered roller bearings. This hydraulic aid will allow you to save valuable time and help you work safely and efficiently. Easy to use roll-around model for both mounting and dismounting.

BETEX BPP & BPPS Side-Shift Bearing Puller Pusher

- Mobile and easy to use by one person
- Suitable for locomotives, passenger and freight cars.
- For safe, simple and fast mounting and dismounting of e.g. TBU, SP and TAROL bearing sets.
- Wide range of accessories available. The accessory sets are available in various sizes, metric and inch versions (housing-type locomotives and passenger cars).
- Pulling capacity (dismounting) 100 t max.
- BBP: Pushing capacity (mounting) adjustable to 68 t max.
- BBPS Side-Shift: Pushing capacity (mounting) adjustable to 100 t max.
- BPPS Side-Shift: Compact and easy to manoeuvre thanks to the 4 caster wheels.
- BPPS Side-Shift: For the different applications (mounting or dismounting) the BPPS must be converted.

Accessory set

Request our questionnaire for sound advice and price estimates.

To order the correct accessory set for bearings (housing-type locomotives and passenger cars), please provide us with the following information:

- Bearing number and manufacturer number
- Drawing of bearing and shaft

Pump

You can choose from 2 models, which are equipped with a manual valve (BETEX EP211D) or a solenoid valve (BETEX EP211DS).

Put together the right hydraulic set

Selecting the right cylinder, pump and accessories

A hydraulic set always comprises a cylinder, pump and accessories. By answering a few questions, we will put together the right combination for you. Depending on the desired application and use, many combinations are possible.

Step 1

Choose a hydraulic cylinder that suits the application best. What you need to consider:

- How many cylinders are required for this application?
What push or pull tonnage is required per cylinder?
- Note: always choose a cylinder with a capacity at least 20% more than what is needed.
- Does the cylinder need to be massive or hollow?
- Which stroke is required?
- Does the cylinder need to fit within limited-clearance work areas? What are the installation dimensions?
- Must the cylinder push, pull or both?
- Single acting cylinders push
- Double acting cylinders push and pull
- Is the weight of the cylinder important and affecting material choice: steel or aluminium?

Good to know

- Cylinders with swivel caps are available if the cylinder needs to withstand off-center loads. (JLLC series, NSSS 10, 25 ton)
- Locking collars are available if the lifted load needs to be supported for longer periods of time.

Step 2

Choose a hydraulic pump, that matches the selected cylinder, consider:

- Do you prefer a hand, foot, air, or electric powered pump?
- How much oil capacity is needed? (= oil capacity X number of cylinders)
- How fast must the pump be?
- What is the frequency of the application?
- Single-acting or double-acting?
- Is the weight of the pump important?
- Available air or electric supply?

Step 3

Choose necessary hydraulic accessories, consider:

- Required hose length and number
- Coupling sets for coupling and uncoupling
- Pressure gauge with T-adaptor
- Manifolds
- Extra hydraulic oil

Put together the right hydraulic kit

Finding the right pump and cylinder combination

When looking for a suitable pump for a cylinder, the (usable) oil capacity should be considered. The usable oil capacity should always exceed the capacity of the cylinder.

Four scenarios are depicted below to explain the principle.

Suitable combination

Because the usable oil capacity of the pump is **GREATER** than the total oil capacity of the cylinder, this combination **CAN** be used.

BETEX AHP 702
Usable oil cap.: 750 cm³

BETEX NSHS 603
Total oil cap.: 680 cm³

Unsuitable combination

Because the usable oil capacity of the pump is **LESS** than the total oil capacity of the two cylinders, this combination can **NOT** be used.

BETEX AHP 702
Usable oil cap.: 750 cm³

2x BETEX NSHS 603
Total oil cap.: 1360 cm³

Suitable combination

Because the usable oil capacity of the pump is **GREATER** than the total oil capacity of the two cylinders, this combination **CAN** be used.

BETEX HC 2000
Usable oil cap.: 1800 cm³

2x BETEX NSCS 502
Total oil cap.: 858 cm³

Unsuitable combination

Because the usable oil capacity of the pump is **LESS** than the total oil capacity of the cylinder, this combination can **NOT** be used.

BETEX AHP 701
Usable oil cap.: 350 cm³

BETEX NSCS 502
Total oil cap.: 429 cm³

Put together the right hydraulic kit

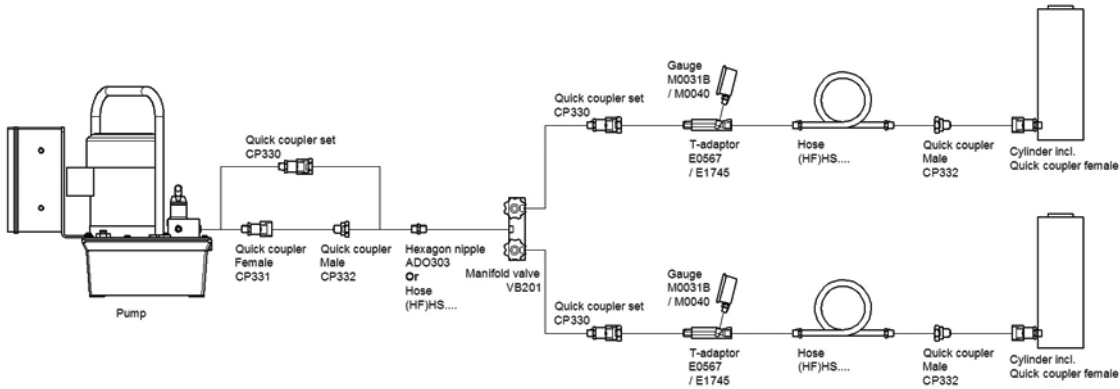

Examples of configurations

In every situation, a certain configuration is required to ensure that the hydraulic oil is used properly and safely. A number of configurations are shown below for different pump-cylinder combinations.

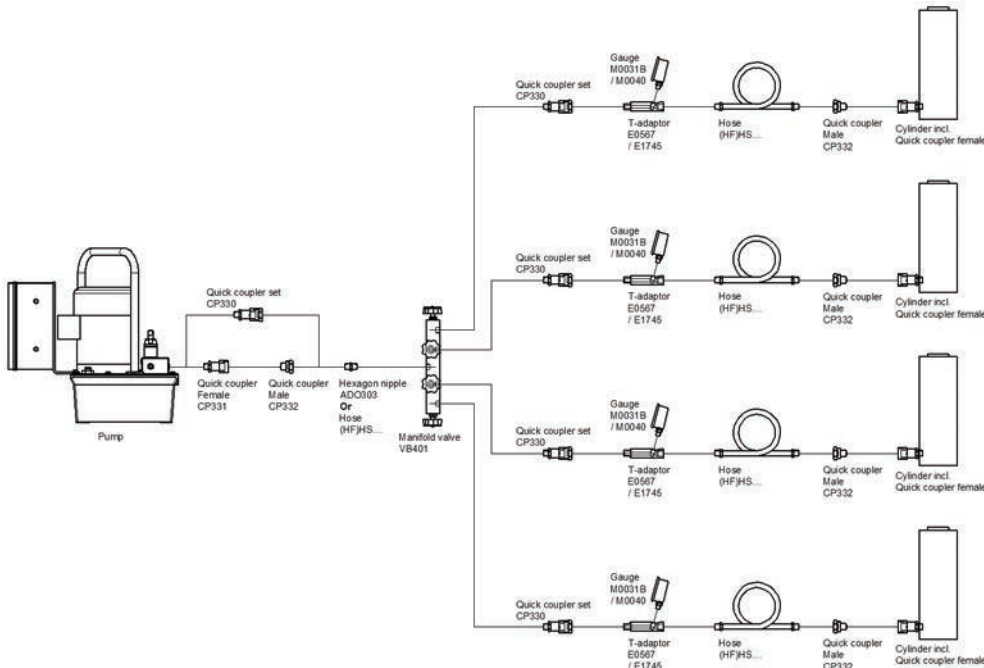

BETEX EP 18S + single-acting cylinder

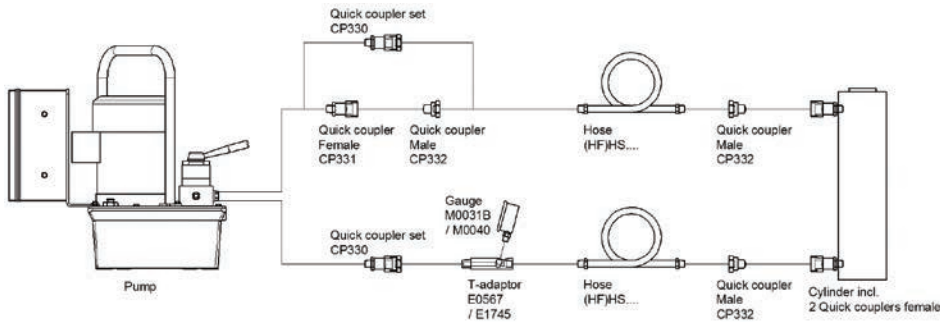

BETEX EP 18S + VB 201 + 2 single-acting cylinders

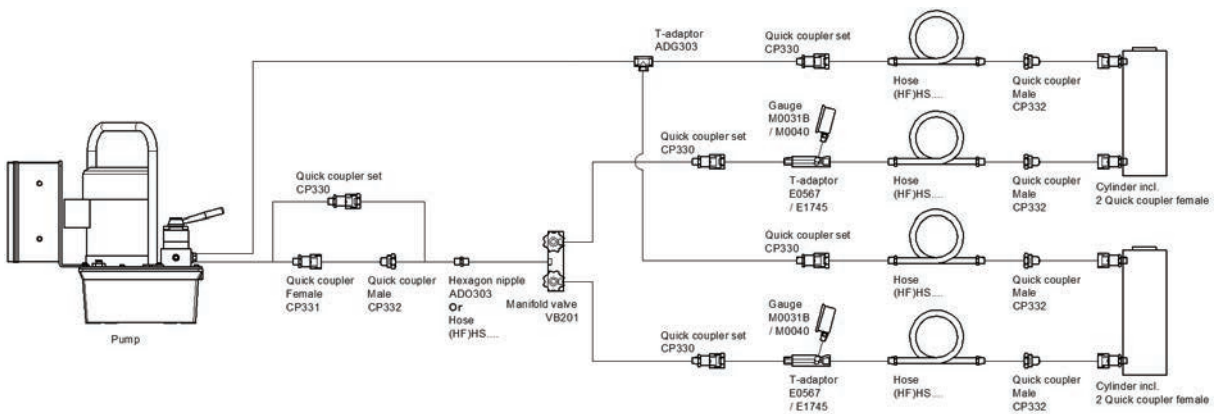

BETEX EP 18S + VB 401 + 4 single-acting cylinders

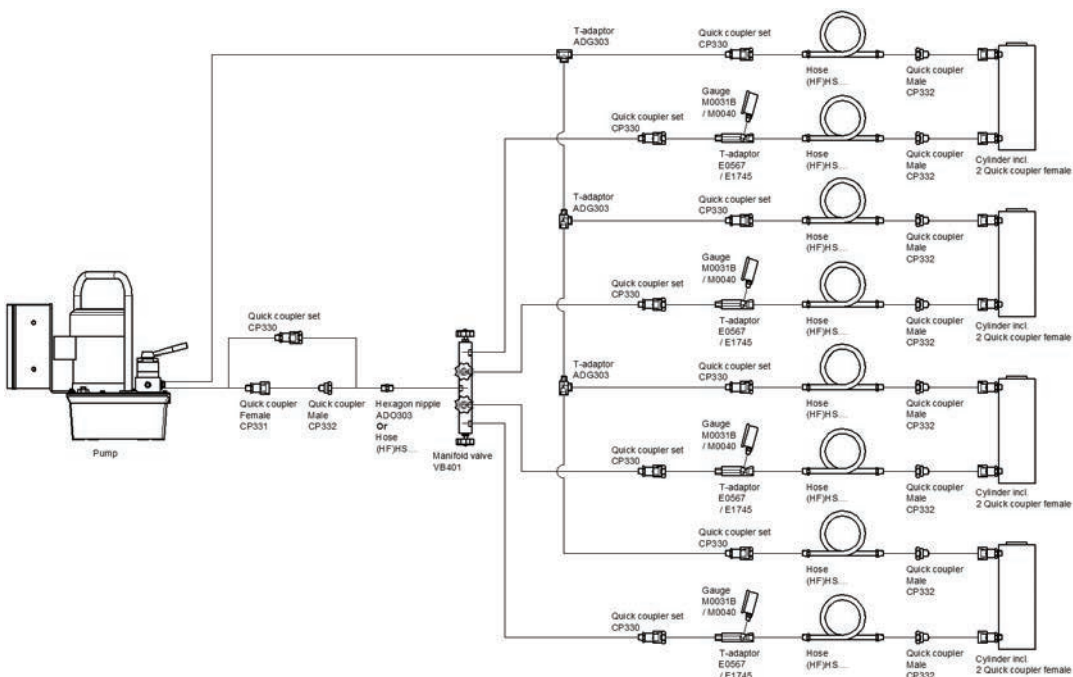

BETEX EP 18D + 1 double-acting cylinder

BETEX EP 18D + VB 201 + 2 double-acting cylinders

BETEX EP 18D + VB 401 + 4 double-acting cylinders

Safety tips

1. Choose the right cylinder

You must know the weight of what you intend to lift and choose a cylinder with at least 20% more capacity. Be aware of possible load shift requiring more capacity at any particular lifting point.

2. Check each component

Check each component before you set up your hydraulic system. Do not use damaged or worn components. Hand them in for repair or replacement.

3. Safety instructions

Read all warning labels and instructions. Operating instructions must be understood before using equipment. Never remove labels from equipment. Replace missing, worn or damaged labels. Always wear safety goggles and protective clothing when using hydraulic equipment.

4. Properly and fully support each cylinder at its base

Every cylinder, whether used individually or in a system, should be completely supported on a solid, firm, non-sliding foundation capable of supporting the load.

5. Fill oil reservoirs with cylinder retracted

Fill pump to the recommended level. Only fill the reservoir when the connected cylinder is fully retracted.

6. Know how your hydraulics work

Do not place any additional weight on the hydraulic cylinder or the hand pump to be able to increase the load.

7. Center the load on the lifting point

The load must be centred on the cylinder, or equally distributed to multiple cylinders. Off-center loading can result in the load slipping and being lost.

8. Distribute the load evenly when using multiple cylinders

For multiple cylinder lifts, you must be able to determine the location and number of lifting points that will allow the load to be evenly distributed to all the cylinders. This is called load balance. Size, center of gravity and load geometry must be considered in order to correctly determine load balance.

9. Support the load

Place blocking or cribbing under the load as you raise it. Insert more blocks as you raise the load. Position yourself in a manner that will keep you clear of the load and will prevent your hands or other body parts from being crushed between the load and blocks.

10. Do not use cylinders as permanent supports

Hydraulic cylinders are not meant to be used as permanent supports, but are designed to lift and lower a load. Blocks or BETEX cylinders with locknut should be used if the lifted load needs to be supported for longer periods of time.

11. Connecting the hydraulics

When making connections with quick couplers, make sure the couplings are fully engaged. Threaded connections, such as fittings, gauges, etc., must be securely tightened and leak free. Never use excessive tightening force. This may distort the fittings or strip the thread profile.

12. Avoid extreme heat or weld splatter

Weld splatter will damage plunger rods and hoses. Hydraulic fluid can ignite if vaporized or exposed to high temperatures.

13. Disconnecting the hydraulics

Never attempt to disconnect hydraulic hoses, fittings or couplers under pressure. Unload the cylinder, open the release screw on the hand pump and operate all hydraulic controls several times. If the system includes a pressure gauge, double-check the gauge to ensure pressure has been completely released.

14. Do not move the pump by pulling at the hose

Dragging or carrying the pumps by a connected hose can damage the couplers and hoses. Using damaged couplers and hoses can be dangerous.

15. Keep hydraulic hoses free of obstructions

Do not drop sharp or heavy objects on the hose. Keep the hose out of heavy traffic areas. Avoid internal damage to hoses. Applying pressure to a damaged hose may cause it to rupture. Avoid sharp bends and kinks when routing hydraulic hoses.

Explanation of cylinders

Features:

- ✓ BETEX® offers a wide selection of cylinder designs, capacities and strokes to match your day-to-day requirements.
- ✓ Built for heavy-duty industrial use. All BETEX® cylinders meet worldwide safety standards.
- ✓ Stop rings, plated pistons and heavy-duty construction provide trouble-free operation and a long service life.
- ✓ Heavy-duty, wound steel-plated springs provide fast and complete retraction, cycle after cycle, and retain their tension longer. Long-lasting springs contribute substantially to the cylinder's service life.
- ✓ Threaded collars and internal plunger threads withstand full loading for maximum flexibility in mounting.
- ✓ All BETEX® cylinders incorporate a positive piston stop to limit piston travel at the end of the stroke, allowing the cylinder to be operated at full stroke. Piston stops add strength and safety.
- ✓ Rod wiper cleans the rod surface during retraction, protecting the inner cylinder assembly from dirt, moisture and other contaminants.
- ✓ BETEX® steel cylinders have a black nitride coating that provides the cylinder with durable protection against dirt, moisture and other contaminants. All aluminium cylinders have a hard anodized finish.

Series	Description	Type	Capacity tons	Stroke mm
NSSS	General purpose, spring return	Single-acting	4.5-100	25.4-406
NSLS	Compact, spring return	Single-acting	5-150	6-17
NSCS	Compact, spring return	Single-acting	10-100	38-62
NSHS	Hollow, spring return	Single-acting	12-100	8-160
JLLC	Pan lock nut, load return	Single-acting	50-1000	50-300
JLPC	Pan lock nut, load return	Single-acting	60-520	45-50
NDAC	General purpose	Double acting	10-100	150-470
NDAH	Hollow	Double acting	30-100	76-257
SSA	Aluminium, spring return	Single-acting	20-100	50-250
ACHC	Aluminium, hollow, spring return	Single-acting	30-60	50-150
ADHC	Aluminium, hollow	Double acting	30-60	50-250
ALNC	Aluminium, lock nut, load return	Single-acting	20-100	50-25

Standard cylinders

BETEX NSSS series, spring-return, single-acting

4.5 - 100
capacity ton

25.4 - 406
stroke mm

700
max. operating pressure bar

Use in combination with our hydraulic pumps and accessories.

BETEX NSSS series

- All cylinders are single-acting with spring-return.
- Pistons are hard chromed.
- Ram inside roll-polished.
- Exterior blasted with black nitride coating.
- Female coupler and dust cap included with all models.

NSSS 51 - NSSS 7513

NSSS 1006 - NSSS 10010

Flat cylinders

BETEX NSLS series, flat, low height, spring-return, single-acting

5 - 150

capacity ton

6 - 17

stroke mm

700

max. operating pressure bar

Use in combination with our hydraulic pumps and accessories.

BETEX NSLS series

- Suitable in confined spaces in combination with a long stroke.
- All cylinders are single-acting with spring-return.
- Pistons are hard chromed.
- Ram inside roll-polished.
- Exterior blasted with black nitride coating.
- Female coupler and dust cap included with all models.

Cylinders with locknut

BETEX JLLC series, high tonnage, load return, single acting

50 - 1000

capacity ton

50 - 300

stroke mm

700

max. operating pressure bar

Use in combination with our hydraulic pumps and accessories.

BETEX JLLC series

- All cylinders are single-acting with load-return.
- With locknut for positive and safe load holding over a long period of time.
- Chrome plated to prevent corrosion and to lower friction for smoother operation.
- Resistant to lateral loading up to 5% of the indicated cylinder capacity without scratching.
- Stop ring for piston blow-out protection.
- Interchangeable, hardened, grooved saddle as standard.
- High-flow coupler and dust cap included with all models.
- Female coupler and dust cap included with all models.
- Cylinders inside roll-polished, outside blasted with black nitride coating.

JLLC 50-200T model

JLLC 300-1000T model

Cylinders with locknut

BETEX JLPC series, high tonnage, load return, compact, single acting

60 - 250

capacity ton

45 - 50

stroke mm

700

max. operating pressure bar

Use in combination with our hydraulic pumps and accessories.

BETEX JLPC series

- All cylinders are single-acting with load-return.
- Extremely low height for use in confined spaces.
- With locknut for positive and safe load holding over a long period of time.
- Chrome plated to prevent corrosion and to lower friction for smoother operation.
- Resistant to lateral loading up to 3% of the indicated cylinder capacity without scratching.
- Pressure relief valve port functions as a stroke limiter.
- Female coupler and dust cap included with all models.
- Cylinders inside roll-polished, outside blasted with black nitride coating.

Aluminium cylinders

BETEX ADHC series, hollow, double-acting

30 - 60

capacity ton

50 - 250

stroke mm

700

max. operating pressure bar

Use in combination with our hydraulic pumps and accessories.

BETEX ADHC series

- Considerably lighter than steel cylinders
- Hard-anodized coating reduces wear and corrosion.
- Stop rings for piston blow-out protection.
- Rod wiper protects inner cylinder from dirt.
- Female coupler and dust cap included with all models.
- Models are fitted with handles as standard.
- Mounting holes base plate: M6 (V), 10 mm deep (Z).

Double-acting cylinders

BETEX NDAC series

10 - 100

capacity ton

150 - 470

stroke mm

700

max. operating pressure bar

Use in combination with our hydraulic pumps and accessories.

BETEX NDAC series

- All cylinders are double-acting.
- Pistons are hard chromed.
- Ram inside roll-polished.
- Exterior blasted with black nitride coating.
- Female coupler and dust cap included with all models.
- Particularly suitable for construction sites, shipyards, utility companies, mining and maintenance workshops.

Overpressure valve

Double-acting cylinders

BETEX NDAH series, hollow

30 - 100

capacity ton

76 - 257

stroke mm

700

max. operating pressure bar

Use in combination with our hydraulic pumps and accessories.

BETEX NDAH series

- All cylinders are double-acting and hollow.
- Pistons are hard chromed.
- Ram inside roll-polished.
- Exterior blasted with black nitride coating.
- Female coupler and dust cap included with all models.
- Particularly suitable for construction sites, shipyards, utility companies, mining and maintenance workshops.

Aluminium hand pumps

BETEX AHP series, lightweight

350 - 1620
usable oil-capacity cm³

700
bar

Use in combination with our hydraulic accessories.

BETEX AHP series

- The aluminium alloy and handy release knobs with locking mechanism make these pumps particularly suitable for industrial applications and day-to-day operations.
- Lightweight, so easy to carry and move.
- Two-stage pumps provide rapid pumping to load the cylinder quickly.
- AHP703D is designed especially for double-acting cylinders, without the need for an extra control valve and adapters.
- Automatic overload-relief valve (700 bar) protects components in hydraulic systems and ensures safe operation.
- **Available separately and as a complete set.**

Pump sets

Hand and foot pumps, 700 bar

BETEX Pump sets 700 bar

Lightweight aluminium or heavy-duty hand pumps, 2-stage. Robust construction for a long service life and easy-operation handles. Easy to move around.

- The double-acting models are provided with double hoses and adapters (AHP 703D and P 904D).
- The air-driven foot pump set AP1600S is designed for use with single-acting cylinders.

All hand pump sets are pre-mounted, you can get started right away!

The sets contain:

- Pump
- Pressure gauge, T-adaptor
- Hose (Polyurethane)
- Couplings
- Steel storage case

Air pumps

BETEX AP 1600 / 3000 / 8000 series, foot pumps

1300 - 7200

usable oil-capacity cm³

700

bar

Use in combination with our hydraulic accessories.

BETEX AP 1600 / 3000 / 8000 series

- The air-driven hydraulic foot pumps are designed for use with single-acting cylinders and tools such as the BETEX® cylinder series.
- Rugged construction: most components are made of aluminium alloy. They have a long service life, and are user-friendly and easy to move.
- The automatic overload-relief valve (700 bar) protects the components in the hydraulic system and ensures safe operation.
- The pumps are equipped with a slow discharge function. Which allows for multi-directional operation.
- Air pressure of 5-8 bar for optimum operation.
- The D models are designed especially for double-acting cylinders, without the need for an extra control valve and adapters.
- **Set:** The AP 1600S is also available as a set.

Air pumps

BETEX AP 921 series, foot pumps

750
usable oil-capacity cm³

700
bar

Use in combination with our hydraulic accessories.

BETEX AP 921 series

- The air-driven hydraulic foot pump is designed for use with single-acting cylinders and tools such as the BETEX® cylinder series.
- Rugged construction: most components are made of aluminium alloy. They have a long service life, and are user-friendly and easy to move.
- Automatic overload-relief valve (700 bar) protects components in hydraulic systems and ensures safe operation.
- Air pressure of 5-8 bar for optimum operation.
- The pump is equipped with a slow deflation function, which allows for multi-directional operation.

bar

BETEX AP 13 series

- The AP 13 has a 3-litre durable aluminium reservoir.
- Air motor capable of starting under full load.
- Two speed operation for fast cylinder advance.
- The automatic overload-relief valve (700 bar) protects the components in the hydraulic system and ensures safe operation.
- Air pressure of 5-8 bar for optimum operation.
- The AP 13D is single-acting; the AP 13S is designed especially for double-acting cylinders, without the need for an extra control valve and adapters.

Ultra-high pressure pumps

BETEX UHAP series, aluminium air pumps

5
litre - reservoir capacity

2800
bar

BETEX UHAP series

General purpose air driven ultra-high pressure hydraulic pump. Suitable for pumping oil up to an operating pressure of 2800 bar.

- Portable, compact.
- Single-acting.
- Max. air pressure: 7 bar.
- Max. output pressure: 2800 bar.
- With easy to connect bayonet coupler and flexible hose (3 mtr).
- Automatic overload-relief valve.
- Air filter and pressure gauge included.
- Optional: trolley.
- Excl. oil.

Both pumps include:

- Pressure gauge (0-3000 bar scale)
- HD hose (3 mtr, incl extra coupler set 1/4")
- Nipple

214 - 6296

Max. drive-up force kN

700

max. operating pressure bar

Use in combination with our "Pump sets for Schaeffler HYDNUT" starting on page 141.

Schaeffler HYDNUT-E

Schaeffler Hydraulic nuts are used to mount bearings with metric or trapezoidal threads on workpieces. The bearings can be mounted directly on a tapered shaft, on an adapter sleeve or on a retraction sleeve. Disassembly is also possible if the bearing is placed on a retraction sleeve or adapter sleeve. The hydraulic nut is suitable for small bearings to very large bearings that require a high drive-up force. These include ship propellers, rudder blades, shaft couplings and gears.

The range of metric nuts are suitable for threads based on DIN sizes M50 to M200. After M200, these nuts are Tr Threaded and available up to a thread diameter of 1,180 mm.

- To be used in combination with special pump sets, see page 141.
- The maximum pressure and available threads are indicated on the pressure ring.
- All hydraulic nuts have a red O-ring showing max. stroke.
- Digital (Art. No. 7499920) and analogue (Art. No. 7499910) dials for accurate measurement of floating clearance when mounting bearings are available as accessories.

inner diameter Ø mm / inch

214 - 3957

max. drive-up force kN

700

max. operating pressure bar

Use in combination with our "Pump sets for Schaeffler HYDNUT" starting on page 141.

Schaeffler HYDNUT-E-INCH

Schaeffler Hydraulic nuts are used to mount bearings with a UN or ACME thread on workpieces. The bearings can be mounted directly on a tapered shaft, on an adapter sleeve or on a retraction sleeve. Disassembly is also possible if the bearing is placed on a retraction sleeve or adapter sleeve. The hydraulic nut is suitable for small bearings to very large bearings that require a high drive-up force. These include ship propellers, rudder blades, shaft couplings and gears.

The range of Inch nuts are suitable for threads based on Inch sizes corresponding to M50 to Tr950. After UN320, these nuts are Tr Threaded and available up to a thread diameter of 950 mm.

- To be used in combination with special pump sets, see page 141.
- The maximum pressure and available threads are indicated on the pressure ring.
- All hydraulic nuts have a red O-ring showing max. stroke.
- Digital (Art. No. 7499920) and analogue (Art. No. 7499910) dials for accurate measurement of floating clearance when mounting bearings are available as accessories.

Hydraulic nuts

Schaeffler HYDNUT-HEAVY

New

100 - 900
inner diameter Ø mm

920 - 12210
max. drive-up force kN

700
max. operating pressure bar

Use in combination with our “Pump sets for Schaeffler HYDNUT” starting on page 141.

Schaeffler HYDNUT-HEAVY

Schaeffler Hydraulic nuts are used to mount bearings with a tapered bore or thread on workpieces. The bearings can be mounted directly on a tapered shaft, on an adapter sleeve or on a retraction sleeve. Disassembly is also possible if the bearing is placed on a retraction sleeve or adapter sleeve. The hydraulic nut is suitable for small bearings to very large bearings that require a high drive-up force. These include ship propellers, rudder blades, shaft couplings and gears.

The range of Heavy nuts are threadless, and available with internal diameters up to 900 mm.

- To be used in combination with special pump sets, see page 141.
- The maximum pressure and available threads are indicated on the pressure ring.
- All hydraulic nuts have a red O-ring showing max. stroke.
- Digital (Art. No. 7499920) and analogue (Art. No. 7499910) dials for accurate measurement of floating clearance when mounting bearings are available as accessories.

Pump sets for Schaeffler HYDNUT

BETEX AHP / AP / EP

New

2500 - 18000

 usable oil-capacity cm³
700/1000

max. operating pressure bar

 Use in combination with our
 "Hydraulic nuts" starting on page
 134.

The sets contain:

- Pump
- Pressure gauge, T-adapter
- Hose
- Couplings
- Steel storage box or wooden crate (EP320S)

BETEX pump sets for Schaeffler HYDNUT

Ready-to-use pump sets have been put together specifically for hydraulic nuts. Depending on the required oil capacity, a suitable pump set is always available. They are very easy to use and come pre-assembled. You can get started right away!

- The AHP 801 and AHP 802 hydraulic hand pumps feature a two-stage device for quick manual pressurisation. These pumps are suitable for hydraulic nuts with a required oil capacity of up to 2 litres.
- The AP 3000 and AP 8000 air-operated hydraulic foot pumps are suitable for hydraulic nuts with a required oil capacity of up to 3 and 8 litres, respectively. Foot controls mean you always have two hands free.
- The EP 320S electric hydraulic pump is suitable for all hydraulic nuts. A remote control allows operation from up to 3 metres away.

Jacks

BETEX CJ series, spring-return, flat, low height

10
tons

20
tons

Use in combination with “BETEX stainless steel shims” starting on page 168.

BETEX CJ series

- With integrated pump and cylinder.
- Available in 10 or 20 ton.
- Stroke: 41 mm.
- Max. operating pressure: 700 bar.
- Hard chromed piston.
- Ram inside roll-polished.
- Particularly suitable for jobs with limited space, such as positioning machines, mounting tools or load tests.
- Can be used in any position.

Toe jacks

BETEX TOE series

2.5 - 50
tons

Use in combination with “BETEX stainless steel shims” starting on page 168.

BETEX TOE series

- Heat-treated and chrome-plated hydraulic rod provides longer seal life and optimum performance
- Internal safety valve prevents toe jack being used beyond its rated capacity.
- Leakages are prevented by welding the housing onto the forged base.
- Low toe heights for tight spaces.
- Swivel sockets for easy operation.
- Toe jacks can be operated easily by hand.
- Removable handle makes unit easier to operate.

Portable power kits

BETEX PPK series

4
tons

10
tons

Use in combination with "BETEX stainless steel shims" starting on page 168.

BETEX PPK series

- 'Snap-on' design for quick and easy assembly and disassembly.
- Extra thick extensions designed for strength prevent bending.
- Single-acting pump, 700 bar with safety valve to prevent overloading.
- Flexible hydraulic hose, 1.8 mtr with spring guards at both ends.
- Versatile thanks to the wide range of accessories!
- All parts are made of forged steel.

Set PPK 4

Incl. 4-ton cylinder, 100 mm stroke, in handy carrying case.

Set PPK 10

Incl. 10-ton cylinder, 150 mm stroke, in handy carrying case on wheels.

Type	PPK 4
Art. no.	7560804
PA350	Heavy duty hydraulic hand pump
HS236	HD hose, 1.8 mtr
RA404	4-ton cylinder with 101.6 mm stroke length
SR05A	Spreader 0.5 ton
B0523	Extension 406.4 mm
B0524	Extension 304.8 mm
B0525	Extension 203.3 mm
B0526	Extension 101.6 mm
B0467	Adapter
F0180	Flat foot
F0181	90 degrees V foot
F0182	Wedge head
F0183	Plunjer toe
F0184	Ram toe
B0013	Flexible rubber cap
F0179	Serrated saddle
G0026	Transport case

Type	PPK 10
Art. no.	7560810
PA600	Heavy duty hydraulic hand pump
HS236	HD hose, 1.8 mtr
RA106L	10-ton cylinder with 152.4 mm stroke length
SR05E	Spreader 0.5 ton
B0711	Extension 482.6 mm
B0712	Extension 355.6 mm
B0713	Extension 254.0 mm
B0714	Extension 127.0 mm
B0406	Adapter
F0174	Flat foot
F0175	90 degrees V foot
F0176	Wedge head

Hydraulic spreaders & lifting wedges

BETEX 15 TL / 15 TLS / 25 TLS series

15
tons

25
tons

Use in combination with “BETEX stainless steel shims” starting on page 168.

BETEX 15 TL / 15 TLS / 25 TLS series

These patented Special Tools are easy to use and designed to spread or lift loads such as motors, gearboxes and flanges with ease and superior accuracy.

- Loads are lifted perpendicularly.
- Ideal for numerous industrial maintenance repair jobs.
- Accurate height adjustments (shaft alignment) can easily be executed by one person.
- Easy, light and very practical to use.
- Can be placed in gaps of 5-43 mm.
- Due to the reduced thickness of the jaws, made of high-quality hardened steel, these wedges can be used for jobs where working space is extremely limited.
- Including safety block to secure the load and remove the lifting wedge/spreader.
- Available separately and as a complete (duo) set in steel case.

Type	Art. no.	Max. cap. tons	Pump type	Max. operating pressure bar	A mm	B mm	L mm	Weight kg

Hydraulic flange spreaders

BETEX PFS 10T series

10
tons

Safety block

BETEX PFS 10T series

- Spreading flanges safely and easily
- No more use of hammer and chisel, so less strenuous, time saving and most of all safe working
- Use flange spreaders in sets for an even higher spreading force
- Adjustable jaw tip widths from 104 to 216 mm for a wide range of applications
- Special wedge for larger spread
- Suitable up to a max. flange width of 2 x 92 mm. The flange bolt has a min. diameter of 31.75 mm

Sets

Various combination sets available in carrying case. All sets are pre-mounted, you can get started right away!

Duo-sets

For more working accuracy, we supply duo-sets with two flange spreaders and a pump with manifold for separate oil flow.

- ✓ You double the spreading capacity
- ✓ Force is distributed more evenly and accurately, preventing warping

Type	Art. no.	Max. cap. tons	Bolt size	Standard wedge mm	Claw width mm	Pump type	Weight kg
PFS 10T	789410	10	M33	3.3 - 28.7	104 - 216	single-acting	15
PFS 10T set (case included)	789411	10	M33	3.3 - 28.7	104 - 216	single-acting	25.2
PFS 10T duo set (case included)	789412	2 x 10	M33	3.3 - 28.7	104 - 216	single-acting	46.6
PFS 10TI Integrated pump (case included)	789413	10	M33	3.3 - 28.7	104 - 216	single-acting	17.5

Sets & duo-sets

Hydraulic spreaders and wedges/spines for lifting, 700 bar

The set always contains:

- 2-stage hand pump
- Pressure gauge, T-adapter
- Male (hose) half coupler, complete quick coupler
- Multi-stage safety block
- Case

15 TL set

- Hydraulic spreader or lifting wedge
- Hose, 1.5 mtr
- Art. no: 789180

The duo-set always contains:

- Pump with manifold for separated oil flows
- 2 Pressure gauges, T-adapters
- 2 Male (hose) half couplers and 2 complete quick couplers
- 2 Multi-stage safety blocks
- Case

15 TLS Duo-set

- 2 hydraulic spreaders
- 2 hoses, 1.5 mtr
- Art. no: 789162

All sets are pre-mounted, you can get started right away!

Duo-sets

- For more precise lifting/spreading.
- The lifting force is divided evenly, thus preventing loads to be pressed askew or lopsided burdening.
- Safe: Perfect straight lifting movement prevents the load from tilting.
- The lifting and spreading capacity is doubled.

PFS 10T set

- Hydraulic flange spreader
- Hose, 1.5 mtr
- Art. no: 789411

PFS 10T Duo-set

- 2 hydraulic spreaders
- 2 hoses, 1.5 mtr
- Art. no: 789412

PFS 10T set

- Hydraulic flange spreader with integrated pump
- Case
- Type PFS 10TI has a built-in hydraulic system for which a separate hose, coupler and hand pump are not necessary. Not available as duo-set.
- Art. no: 789413

Nut splitters

BETEX HNS series

10 - 50
tons

Use in combination with hydraulic hand pumps.

BETEX HNS series

- Compact design used in confined space with enough force to split rusted nuts.
- All models feature a rugged one-piece cutting frame coupled to a heavy-duty hydraulic cylinder
- Specially designed 'tool steel' cutter blade cuts the nut to the precise point where it cracks.
- Unique angled head design to keep full contact with the nut being penetrated.
- Unique angled cutter blade with radius to have greater resistance to cutting and breaking nuts.
- 5 current models suitable up to and including nut class 12.9

Tapered roller bearing press

BETEX TOOL-RAILWAY-SEALCAP-PRESS2

New

10
tons

Use in combination with our hydraulic pumps and accessories.

BETEX TOOL RAILWAY SEALCAP PRESS2

The hydraulic press is used to assemble and disassemble seals on tapered roller bearing units, also known as TAROL units. Suitable for all common sizes of TAROL units in rail applications.

- The base plate has rubber feet at the corners and countersunk holes (M8) for mounting on a workbench or trolley.
- The TOOL RAILWAY SEALCAP PRESS2 is driven using the NSSS 106 cylinder (Capacity: 10 tons / Stroke: 152.2mm).
- The round stainless steel plate can be reordered as a spare part.
- Bearing-specific sealing cap tool kits are required for use and are tested and offered if required.

Hydraulic accessories

Max. operating pressure, 700 bar

With this simple yet complete line of accessories, consisting of hydraulic hoses, couplers, fittings, manifolds and pressure gauges, BETEX Hydraulics has the right accessory for a secure and optimally functioning system.

Hoses

- Heavy-duty hoses for 700 bar, meet global safety standards.
- Hoses are black rubber coated with two layers of steel braided reinforcement.
- Flexible hoses with spring guards at both ends.
- Available to special lengths upon request.
- Hose connection $\frac{3}{8}$ " NPT

Coupler sets

- BETEX supplies a variety of screw-set quick couplers in 4 different sizes. These can also be used on existing hydraulic systems.
- All couplers are rated to 700 bar and have an anti-leak mechanism that works at both high and low pressure.

Hydraulic oil

BETEX LPS 78, Premium hydraulic oil

BETEX LPS 78 equivalent to ISO-15

- High-quality hydraulic oil with low pour point.
- Contains anti-wear, anti-rust, anti-oxidant and anti-foaming additives with high viscosity index.
- For pumps and cylinders, 700 bar.
- Choice of 4 different volumes: 1, 2, 4 or 5 litres.

Workbench

BETEX Mobilift

In case of bad working posture. Work desk too low. The feet cannot be placed under the workbench.

The adjustable working height and space for feet allow users to adopt the right working posture, with a straight back and the workbench close to the body.

BETEX Mobilift

The BETEX Mobilift is a workbench with a modern construction based on a unique one-arm lifting principle. The workbench is mobile and stable. No hindrance from cables running across the floor thanks to the hydraulic pump. All these features make the BETEX Mobilift a very popular addition to workshops and – after getting acquainted with it – it is impossible to imagine working without it.

BETEX Mobilift workbenches are available with 2 types of load capacity, 400 or 1000 kg.

Advantages:

- Very stable, therefore very suitable as a workbench.
- Extra safe thanks to lack of ‘scissor’ movement.
- Wooden workbench prevents workpieces from slipping.
- Equipped with 2 lockable drawers.
- Easy operation.
- Promotes right working posture!

25
tons

The WSP workshop presses are supplied with adapters and accessories.

BETEX WSP

BETEX WSP 10 ton

Ideal for small pressing jobs. Repair of motors, transmissions, mounting and dismantling of couplings, bearings and other workpieces.

BETEX WSP 25 ton

Suitable for heavy-duty pressing jobs, in garages, industrial workshops, for mounting and dismantling of couplings, bearings and other workpieces.

- The robust steel frame provides maximum stability and cannot bend.
- Various operating positions possible for the press bed.
- Steel crossbars prevent the frame from deforming when loaded.
- Available in 2 models: 10 and 25 tons.
- Includes pressure gauge for exact pressure readings.
- Single-acting and spring-return cylinder can be moved horizontally on the upper frame.
- Also available with hand, electric or air-hydraulic pump.

Hand and foot pedal for double operation

Height-adjustable table using a hoist

Integrated pressure gauge

Set of V adapters

BETEX WSPM

These robust hydraulic workshop presses are suited for professional assembly work, or for professional testing of a wide range of workpieces. They are used for pressing, straightening, bending, punching, assembly, disassembly, etc.

The piston is easy to operate using the hand pump. While operating the press, operation can be switched from hand pump to foot pump.

- High quality! The robust steel frame is welded for maximum stability and a long services life.
- Work surface height is easy to adjust.
- Extremely suitable for high-precision work.
- The 50-ton version of the press is equipped with a hoist.
- Chrome-plated piston with automatic return.
- Single-acting and spring-return cylinder can be moved horizontally on the upper frame (for 50 ton models only).
- Includes pressure gauge for exact capacity readings.
- Includes a set of V adapters.

BETEX WSPE

These electric hydraulic workshop presses are suited for general assembly work, straightening, and for testing a wide range of workpieces.

Unique! You have a choice of two different piston speeds: as soon as the rapidly lowering piston detects counter pressure, it will automatically switch back to a lower speed.

- High quality! The robust steel frame is welded for maximum stability and a long services life.
- Extremely well suited for high-precision work, manual or electric operation.
- Work surface height is easy to adjust.
- Cylinder can be moved horizontally on the upper frame.
- Two piston speeds, chrome-plated piston with removable piston head.
- Includes pressure gauge for exact pressure readings.
- Joystick for high-precision piston operation.
- Double-acting hand pump (100 to 200 ton version) for high-precision piston operation.
- 220V CEE connector to connect a lamp or drill, if required.
- The presses are supplied without oil. (Recommended: Tellus 46)

Optional

- Foot pedal (30-300t)
- Set of V blocks

Operation

Press force regulation

Regulate the press force using this knob.

Work surface adjustment

Adjust the work surface height by placing the horseshoe (and the chain) around the piston. The chain is attached to the work surface. Use the joystick to raise or lower the work surface, using the pins to lock the work surface in place.

Cylinder position:

Positioning the cylinder is extremely fast (takes under 10 seconds). Move the cylinders to the left or the right by turning the cylinders to the left or the right by turning the levers and gripping the handle with your hand. Tighten the levers as soon as the cylinder is positioned the way you want it.

Speed

Unique: WSPE presses offer two operating speeds! At speed 1, the piston will move at ± 2.3 mm/sec. At speed 2, the piston will move at ± 9.5 mm/sec. As soon as the fast-lowering piston detects counter pressure, it will automatically switch back to the lower speed of 2.3 mm/sec. Exact speeds depend on the type of WSPE press.

Joystick:

Use the joystick to operate the WSPE presses, moving them up or down.

Hand pump:

The hand pump (100-200 tons versions) lets you perform high-precision work (in combination with the joystick). Note: the 300-ton press comes with a foot pedal or remote control.

Workshop presses

BETEX PFPE Portal presses, manual/electric

100
tons

160
tons

BETEX PFPE

These robust hydraulic portal presses with a manually operated portal are made of high-grade steel. They are extremely suitable for the shaping, straightening or bending of large sheets and heavy materials.

The frame can be moved lengthwise and the cylinder can be moved sideways, enabling access to the material from all sides.

The cylinder and frame can be moved manually. The hydraulic system is very precise, whether the press is operated electrically or manually (using the hand pump). This portal press is equipped with an integrated pressure gauge. The two-speed motorised hydraulic unit has automatic high-speed shutdown and includes a pressure regulator, a joystick to operate the cylinder and a hand pump for high-accuracy pressing.

The machine is supplied with cylinder extension as standard. (Excl. oil, Tellus 46).

Options:

- Flat lower table.
- Custom dimensions, versions and tonnages available on request.
- Set of V blocks.
- Remote control/foot pedal.

BETEX PFPE

These robust hydraulic portal presses are made of high-grade steel. They are extremely suitable for the shaping, straightening or bending of large sheets and heavy materials. The frame can be moved lengthwise and the cylinder can be moved sideways, enabling access to the material from all sides.

All portal presses are equipped with a double-acting cylinder with a chrome-plated piston and anti-wear guides to protect the cylinder. This press bushing has been designed especially so that different attachments can be fitted to it. The piston stroke is easy to set using the dedicated switches and suspended remote control, which can also be used for moving the frame and cylinder.

There is an emergency stop with interlock. The control panel (on the right side of the machine) includes a switch for the required work type (manual or semi-automatic). The two-speed electric hydraulic pump automatically switches to the lower speed when it detects counter pressure. The hydraulic pump is also equipped with a pressure controller and a gauge. (Excl. oil, Tellus 46).

- Made of ST-52.3 steel
- Large working desk with movable portal

Options:

- Flat lower table.
- Custom dimensions and tonnages available on request.

Peel-off Shims

BETEX stainless steel shims

Use in combination with: jacks, spreaders and alignment equipment.

BETEX peel-off shims

- Laminated pre-cut peel-off shims.
- Made of high-quality stainless steel to prevent corrosion.
- Available in 4 sizes.
- 12 peel-off layers (8 x 0.1 mm and 4 x 0.05 mm).
- Burr-free with specially rounded corners.
- They always fit! Simply peel off until the right thickness is obtained.

Solid Shims

BETEX stainless steel shims

Use in combination with: jacks, spreaders and alignment equipment.

BETEX stainless steel shims

Precut stainless steel shims for fast, simple and precise machine alignment.

- Available in 6 difference sizes and 12 thicknesses.
- Packed in sets of 10 shims.
- High-quality, non-corroding material.
- The shim's thickness is etched on each shim.
- 24 standard combinations in handy cases.
- Suitable for reuse.

Your benefits:

- ✓ You have the right size available for immediate use.
- ✓ The shims have been smoothed and have no burrs.
- ✓ Precise machine alignment helps you get the best machine performance.
- ✓ Stock control. This is now simpler and easier to verify.
- ✓ Now also available in 2 and 3 mm thickness!

Solid Shims

BETEX Shim cases

- BETEX shims - solid stainless steel (AISI 304, DIN 1.4301) in robust carrying cases with convenient storage compartments. The ABCD & E cases have wheels.
- The cases contain various shims up to 5 dimensions (HxW): A 50mm, B 75mm, C 100mm, D 125mm and E 200mm.
- The shims are available in 12 different thicknesses from 0.025 to 3.00 mm.
- There are 24 standard combinations, other combinations are available on request.
- To refill the cases, the BETEX shims are supplied in packs of 10.

Use in combination with: jacks, spreaders and alignment equipment.

Shaft alignment system

Fixturlaser AT-100

The Fixturlaser AT-100 consists of two wireless sensors. The use of line lasers minimizes setup time. To make it even easier, the sensors are pre-mounted and are pre-set to the most common setup.

The free software runs on an iOS or Android tablet or phone, guiding the user through the entire alignment process. The user interface is entirely graphical and uses no text, so there are no language barriers to overcome.

In addition, the screen clearly shows the current position of the machine and indicates when the alignment is completed. A log with all relevant information is created and saved automatically.

The Fixturlaser is designed for use with the free Laser Kit App.

- Adaptive user interface.
- VertiZontal Moves.
- Pre-mounted sensors.
- Bluetooth Auto Connect.

Complete system

- 2 measuring units (M8 & S8)
- 2 V-brackets with chain (500 mm)
- 1 tape measure, 5 m
- 1 charger
- 1 charging cable
- 1 shaft for rods
- 1 manual
- 1 carrying case

Use in combination with “BETEX stainless steel shims” starting on page 168.

Dimensions LxWxH	400 x 300 x 200 mm
Sensor units	
Dimensions LxWxH	94 x 87 x 37 mm
Weight	0,222 kg
Detector	Digital line sensor
Detector reach	20 mm / 0.01 mm
Connection	Class I Bluetooth transmitter
Communication range	10 m (33 ft)
Measuring distance	Up to 2 m
Measurement accuracy	3% +/- 1 digit
Angular accuracy	+/- 3°
Laser type / Laser class	650 nm diode laser / Safety class II
Laser power	< 1 mW
Operating time	12 h
Protection class	IP54
Operating temperature	0 to 50 °C (32 to 122 °F)
Brackets	
Shaft diameter	Ø30 - 150 mm
Rods	2 pcs 150 mm

Shaft alignment system

Easy-Laser XT440

Easy alignment with maximum flexibility

The Easy-Laser XT440 is the first alignment system of the new XT generation. This shaft alignment system is platform independent and can therefore also be used with iOS and Android devices. The Easy-Laser XT440 is very robust, waterproof and dustproof (IP66/IP67). To make this new generation Easy-Laser as user-friendly as possible, all XT measuring programs have been collected in a single user-friendly app that can be downloaded for free.

- Able to align shafts both horizontally and vertically!
- The app works on your iOS or Android phone or tablet.
- No licenses. The measuring units determine which measurements can be carried out.
- Saves measurements.
- Possibility to save notes and photos.
- Information can be shared with your customer by email.
- The XT products are very robust, waterproof and dustproof (IP66/IP67).
- Long battery life.
- Use in combination with XT190.

Optional:

- XT12 display
- XT12 display with integrated thermal camera

Type	Easy Laser XT440
Art. no.	780320
Dimensions LxWxH	460 x 350 x 175 mm
Weight incl. all parts	7.2 kg

Sensor unit M/S	
Detector	True PSD 30 mm
Connection	Bluetooth
Measurement accuracy	< 1 % / up to 10 m
Laser type / Laser class	Diode laser / Safety class II
Casing material	Anodised alu PC/ABS + TPE
Dimensions LxWxH	76 x 76.7 x 39.3 mm
Weight	245 g

Type	XT12 display
Art. no.	780319
Art. no. (With IR camera)	780318

Display unit XT12	
Operating temperature	-10 to 50°C / 14 to 122 °F
Display	VGA 8" colour display, LED
Power / Operating time	Heavy duty Li Ion rechargeable / 16 hours
Connection	WiFi
Casing material	PC/ABS + TPE
Dimensions LxWxH	274 x 190 x 44 mm
Weight	1,450 g
Cable (loading)	Splitter 1 m
Brackets (chain)	V bracket for chains, width 18 mm, shaft diameter 20-150 mm
Rods	120 mm, 60 mm extendable / Stainless steel

Complete system

- 1 measuring unit XT40-M
- 1 measuring unit XT40-S
- 2 measuring units (M & S)
- 2 chain brackets with rods
- 4 rods, 60 mm
- 1 tape measure, 3 m
- 1 hex key set
- 1 charger (100-240V AC)
- 1 DC splitter cable
- DC-USB adapter, for charging
- 1 quick-start manual
- USB with manuals
- 1 carrying case

Shaft alignment system

Fixturlaser ECO

The ECO makes alignment equipment available to everyone thanks to its price/quality ratio.

The 20 mm sensors and user-friendly interface ensure that alignment can be performed in any situation.

- Integrated Bluetooth.
- Pre-mounted brackets.
- 4" colour display.
- VertiZontal Moves, innovative and time-saving features.
- Screen flip.
- 8 hours of battery time, when used continuously.
- CCD sensor technology.
- Actual values during adjustment.
- IP65 classified (resistant to extreme conditions).
- Narrow wireless sensor unit.

Complete system

- 1 display unit ECO
- 2 measuring units (S6 & M6)
- 1 tape measure, 5m
- 1 EUR/US power cable, 2 m
- 2 USB cable A-mini B 0.5 m black
- 2 USB cable A-mini B 1.5 m black
- 2 V-brackets with chain
- 2 universal tools
- 1 manual
- 1 carrying case

Use in combination with "BETEX stainless steel shims" starting on page 168.

Type	Fixturlaser ECO
Art. no.	780346
Weight incl. all parts	4.8 kg
Dimensions LxWxH	415 x 325 x 180 mm
Display unit	
Dimensions LxWxH	181 x 106 x 34 mm
Weight	0.36 kg
Display	4" (102 mm) diagonal 84x56 mm
Operating time	8 hours continuous
Sensor / units	
Weight	M6 200 g / S6 188 g
Protection class	IP65
Measuring distance	Up to 3 m
Detector	Digital line sensor
Detector reach / resolution	20 mm / 1% ±1 number
Measurement accuracy	0.3% ±7 µm
Brackets	
Shaft diameter	Ø25-175 mm / Ø25-450 mm + chain
Rods	4 pcs 150 mm

Shaft alignment system

Fixturlaser EVO

The new laser alignment system, the Fixturlaser EVO, is based on simplicity. The user is guided through the alignment process using colour-coded symbols. The Fixturlaser EVO has an extensive software package, including the Feetlock program that can be used when machines are fixed.

- Integrated Bluetooth.
- 5" colour display, compact and lightweight.
- VertiZontal Moves, innovative and time-saving features.
- Screen flip.
- CCD sensor technology.
- Actual values during adjustment.
- IP65 classified (resistant to extreme conditions).
- Narrow wireless sensor units.
- 8 hours of battery time, when used continuously.

Complete system

- 1 display unit EVO
- 2 measuring units (M3 & S3)
- 2 V-brackets complete
- 2 chains, 8 mm
- 1 tape measure, 5 m
- 1 EUR/US power cable, 2 m
- 3 USB cable A-mini B 2 m, USB cable A-mini 0.5 m
- 1 EUR/US power supply, 2 m
- 2 universal tools
- 1 manual
- 1 carrying case

Use in combination with "BETEX stainless steel shims" starting on page 168.

Type	Fixturlaser EVO
Art. no.	780347
Weight incl. all parts	5.4 kg
Dimensions LxWxH	415 x 325 x 180 mm
Display unit	
Dimensions LxWxH	181 x 103 x 180 mm
Weight	0.36 kg incl. battery
Display	5" (127 mm) diagonal / 111x63 mm
Operating time	8 hours continuous
Sensor / units	
Weight	M3 212 g / S3 188 g
Dimensions LxWxH	92 x 77 x 33 mm
Protection class	IP65
Measuring distance	Up to 10 m
Detector	2nd generation digital sensor
Detector reach / resolution	30 mm / 1 µm
Measurement accuracy	0.3% ±7 µm
Brackets	
Shaft diameter	Ø25 - 175 mm
With extension chain	Ø25 - 450 mm
Rods	4 pcs 150 mm

Shaft alignment system

Fixturlaser NXA Pro

A shaft alignment system based on a digital laser! The NXA Pro is very compact: with a width of only 33.5 mm, the sensor units fit into the narrowest of spaces. The sensor units have long-life batteries, Bluetooth communication and gyroscopes. The gyroscopes make it possible to measure according to the Tripoint Method in the vertical shaft alignment application, something that no other shaft alignment instrument is capable of!

- OmniView: 6.5" display with icons and symbols to guide the user.
- Gyroscope with unique Tripoint Method for vertical shaft alignment.
- VertiZontal Moves, innovative and time-saving features.
- Integrated Bluetooth.
- Battery management, 10 hours of continuous operation, display charged to an 80% capacity within 1 hour.
- CCD sensor technology.
- Actual values during adjustment.
- IP65 classified (resistant to extreme conditions).
- Very compact sensor units.
- Measurements can be saved and copied to a USB stick.

Complete system

- 1 NXA Pro display unit
- 2 measuring units (M3 & S3)
- 2 V-brackets, 2 magnetic V-brackets
- 1 extension fixture
- 1 USB stick
- 1 magnetic base, 1 rod kit
- 1 power supply
- 1 chain 8 mm, 60 links
- 1 tape measure, 5 m
- 2 shafts for rods
- 1 manual (in English)
- 1 carrying case

Use in combination with "BETEX stainless steel shims" starting on page 168.

Type	Fixturlaser NXA Pro
Art. no.	780348
Weight incl. all parts	7.7 kg
Dimensions LxWxH	415 x 325 x 180 mm
Display unit	
Dimensions LxWxH	124 x 158 x 49 mm
Weight	1.2 kg
Protection class	IP65
Display	6.5" (165 mm) diagonal (133x100mm)
Gyroscope	6-axis MEMS inertial measurement sensor with drift compensation and autom. field calibration
Operating time	10 hours continuous (with 50% LCD display light)
Charge time / Operation time	1 hour of charging > 6 hours of operation
Sensor / units	
Weight	M3 212 g / S3 188 g
Dimensions LxWxH	92 x 77 x 33 mm
Protection class	IP65
Measuring distance	Up to 10 m
Detector	Quaity degree Ultra HD CCD
Detector reach / resolution	30 mm / 1 µm
Measurement accuracy	0.3% ±7 µm
Gyroscope	Refer to Display unit
Operating time	17 hours continuous
Shaft brackets	
Shaft diameter	Ø20 - 450 mm
Rods	4 pcs 85 mm and 4 pcs 160 mm (extendable to 245 mm)

Shaft alignment system

Schaeffler LASER-EQUILIGN2

The accurate alignment of rotary shafts is essential for cost-effective production in any industry. This reduces energy consumption, increases machine availability and extends machine service life. LASER-EQUILIGN2, the new generation of laser alignment systems for horizontal applications, features maximum precision, extreme efficiency, and convenient operation. Single laser technology enables accurate measurements in any situation.

LASER-EQUILIGN2 can be installed quickly and easily. The portable tablet simplifies operation by guiding users step by step through the alignment process.

- Maximum precision thanks to single laser technology
- Economical solution for horizontal alignment
- Quick and easy to install
- User-friendly operation with non-verbal user interface
- Large 8-inch display with touchscreen

Complete system

- 1 handheld tablet
- 1 shaft brackets for laser/sensor unit and reflector
- 1 laser/sensor
- 1 reflector with roof prism
- Various cables for data transfer or charging sensor/tablet
- 1 tape measure
- 1 hex wrench, SW 4
- 1 carrying case

Use in combination with “BETEX stainless steel shims” starting on page 168.

Type	Schaeffler LASER-EQUILIGN2
Art. no.	780500
Weight incl. all parts	7.8 kg
Dimensions LxWxH	500 x 410 x 140 mm
Display unit	
Weight	0.71 kg
Dimensions LxWxH	256 x 149 x 35 mm
Protection class	IP68
Display	8" (203 mm) diagonal
Operating time	Up to 11 hours
Sensor / units	
Weight	210 g with dust cap
Dimensions LxWxH	105 x 96 x 55 mm
Protection class	IP65
Measuring distance	Up to 30 m
Detector	
Detector reach / resolution	Unlimited / 1 µm
Measurement accuracy	> 98%
Operating time	10 hours continuous

Pulley alignment system

Schaeffler LASER-SMARTY3

The LASER-SMARTY3 is an extremely affordable and universally applicable disc and pulley alignment system for aligning V-belts, toothed belts, flat belts and chain drives.

The LASER-SMARTY3 is applicable to both magnetic and non-magnetic discs. It has two magnetic aligning blocks with offset control to allow, if necessary, thickness differences of the pulley discs. This allows you to measure the parallel and angular errors between both pulleys directly in relation to the belt position in the groove. The magnetic straighteners and device can be mounted within seconds. A visible laser appears on the target blocks. If the laser line shines exactly through the slots of the alignment blocks, the discs are aligned. The result is a fast and accurate alignment.

- Displays parallel error and angular error between pulley discs.
- Works faster and more accurately.
- For both horizontal- and vertical-mounted machines.
- Can also be used with non-ferrous discs.
- Can be operated by 1 person.
- Measuring distance 0.04 - 3 metres. (LOW power mode)
- Measuring distance 0.5 - 10 metres. (HIGH power mode)

Complete system

- 1 laser
- 2 targets
- 1 nylon carrying bag + instructions for use

Use in combination with “BETEX stainless steel shims” starting on page 168.

Type	Schaeffler LASER-SMARTY3
Art. no.	7803105
Laser transmitter	
Disc diameters	Ø60mm and larger
Laser class	2
Laser wave length / radiation angle	635-670 nm / 60°
Accuracy	Laser plane – Reference plane Parallelity: <0.05°, Offset <0.2 mm
Power / Operating time	1x (AA) 1.5 V / 12 hours
Casing material	ABS plastic / hard anodised alu
Weight	265 g
Dimensions LxWxH	145 x 86 x 30 mm

Pulley alignment system

Schaeffler LASER-TRUMMY2

Proper belt tensioning is an essential prerequisite for maximum service life of the belt drive and drivetrain components.

The LASER-TRUMMY2 is a sturdy optical-electronic hand-held measuring instrument for measuring belt tension. The measuring instrument is equipped with a wireless measuring probe for direct connection and a wired measuring probe for hard-to-reach places. Measurement is carried out while the machine is stationary. The device displays two readings. The frequency in Hz and the belt tension in N. The corresponding measured value can be compared with the target value specified by the belt-drive manufacturers.

Maximum performance and optimum belt-drive service life depend on proper alignment.

Proper belt tension:

- Prevents damage to bearings
- Reduction of drive-component wear
- Reduction of running noise
- Lowers energy costs
- Simple operation and very user-friendly

Complete system

- 1 measuring instrument
- 1 measuring sensor with cable
- 1 plug-in sensor
- 1 battery 9V
- 1 carrying case

Use in combination with "BETEX stainless steel shims" starting on page 168.

Typ	Schaeffler LASER-TRUMMY2
Art. no.	780703
Dimensions case LxWxH mm	255 x 210 x 60
Sensor / units	
Weight kg	0,98
Dimensions LxWxH mm	80 x 126 x 37
Operating temperature	+10°C ... +50°C
Measuring range	10 Hz – 800 Hz
Display	2 lines LCD, 16 characters
Power	Battery (9V)
Casing material	Plastic (ABS)
Minimum free belt strand	> 150 mm
Display error	± 1 Hz
Total error	< 5%
Available languages	10
Input limit free strand length	≤ 9,99 m
Input limit belt mass	≤ 9,999 kg/m
Calibration (recommended)	max. 2 years (periodic)

Pulley alignment system

Fixturlaser PAT

The PAT alignment laser for pulleys will be your final solution for all your pulley alignment jobs! Because the groove of the belt is used as a reference, you can see at a glance whether the pulleys are properly aligned or not.

The PAT is supplied with two laser units, both equipped with a spring mechanism that can be fixed in the grooves of the pulleys. In addition, the PAT is equipped with various sized removable guides allowing the lasers to be mounted on most standard gauges (A-E 6 mm - 40 mm). Additional guides are available as accessories.

The use of two laser units makes it very easy for the user to determine the adjustment required, e.g. whether to correct a parallel error or an angular error. Within a few seconds it is clear whether the pulleys need to be aligned.

Timing belt tips/guides for timing-belt alignment are available as an accessory (Art. no. 780701).

Complete system

- 2 boxes of V-guide tips
- 1 pair of laser transmitters
- 4 AAA batteries
- 1 carrying case

Type	Fixturlaser PAT
Art. no.	780700
Weight incl. all parts	1.5 kg
Dimensions LxWxH	250 x 180 x 80 mm
Sensor units	
Weight	340 g
Dimensions LxWxH	61 x 77 x 61 mm
Laser	630 – 675 nm class 2 diode laser
Laser line angle	90°
Laser power	< 1 mW
Measuring distance	50 mm - 6000 mm
Measurement accuracy	In excess of 0.5 m or 0.2 degrees
Disc diameter range	75 mm and larger
Pulley belt groove width	6 mm - 40 mm
Power / Operating time	2 AAA batteries / 20 hours continuous

Box with V-guide tips

Timing belt adapter set for PAT

Pulley alignment system

Easy-Laser XT190 BTA

A wireless and digital disc and pulley alignment system for the alignment of V-belts, toothed belts, flat belts and chain drives.

- Actual digital values for even greater accuracy.
- Possibility to save measurement results in a report/PDF creates long-term advantages and is beneficial for the service life of belts and chains.
- Can be used on your own Android or iOS device with app.
- Accurate, efficient and user-friendly.
- Simultaneous horizontal and vertical alignment.
- Easy to operate by 1 person.
- Use in combination with XT440.

Complete system

- 1 laser / 1 sensor
- 2 targets
- 1 charger (100-240V AC) + cable
- 1 USB stick with documentation
- 1 carrying case

Use in combination with “BETEX stainless steel shims” starting on page 168.

Type	Easy-Laser XT190 BTA
Art. no.	7803104
Dimensions case LxWxH	270 x 225 x 80 mm
Laser transmitter	
Disc diameters	Ø60mm and larger
Laser class	2
Laser wave length / radiation angle	635-670 nm / 60°
Accuracy	Laser plane – Reference plane Parallelity: $\lt;0.05^\circ$, Offset $\lt;0.2\text{ mm}$
Power / Operating time	1x (AA) 1.5 V / 8 hours
Casing material	ABS plastic / hard anodised alu
Weight	270 g
Dimensions LxWxH	145 x 86 x 30 mm
Detector	
Measuring distance	Up to 3 m between transmitter and receiver
Measuring range	Axial offset: $\pm 3\text{ mm}$. Angular value $\pm 8^\circ$
Display	Yellow OLED 96 x 96 pixels
Connection	Bluetooth wireless technology
Battery type / life	Li-Po / 5 hours continuous
Casing material	ABS plastic / anodised alu
Weight	190 g
Dimensions LxWxH	95 x 95 x 36mm

Monitoring

Laser thermometers

Portable digital laser/infrared thermometer with a perfect price/quality ratio. The instruments measure very accurately, are low in energy consumption and easy to operate.

Ideal for fast and safe measurement of liquids, gases and many other substances, as well as for temperature measurements of motors, brake systems and heating systems.

The thermometers all have:

- Illuminated LCD display
- Accuracy 0.1°C
- Automatic 'hold' function
- Readable temperature of 0.1°C
- Measurement in Celsius or Fahrenheit
- Batteries
- User Manual

BETEX 1240

Infrared thermometer

- Measuring range: -50°C to 500°C
- Incl. transport bag

Type	BETEX 1240
Art. no.	610040
Measuring range	-50 ... +500 °C / -58 ... +932 °F
Accuracy	±3 °C / 5,4 °F at -50 +20 °C / -58 +68 °F
Resolution	0.1 °C / 0.1 °F
Spot ratio	12:1
Emissivity	0,95 (fixed)
Laser class	Class 2
Automatic switch-off	Yes
Power	9V battery
Weight	250 g
Dimensions LxWxH	95 x 82 x 192 mm

BETEX 1300

Digital thermometer

- Measuring range: -210°C to 1372°C
- 2 thermowire sensors

Type	BETEX 1300
Art. no.	610260
Measuring range thermocouple K Type	-200 to 1372 °C / -328 to 2501 °F
Measuring range thermocouple J Type	-210 to 1100 °C / -346 to 2012 °F
Accuracy	>100 °C (148 °F) ± [0.15 % of reading +1 °C (1.8 °F)] <100 °C (148 °F) ± [0.5 % of reading +2 °C (3.6 °F)]
Measurement	Direct / differential (T1-T2)
Adjustable units	°C / °F / K
Automatic switch-off	After 20 min. of inactivity
Power	3x 1.5V AAA batteries
Weight	145 g
Dimensions LxWxH	160 x 60 x 25 mm

Monitoring

Decibel meter / Tachometer

BETEX 1500

Decibel meter / sound meter

Includes

- Adapters
- Wheel
- Inner and outer cone
- 3 reflective tapes
- Bag

Type	BETEX 1500
Art. no.	610270
Measuring range	35 - 135 dB
Dynamic range	50 dB
Frequency range	31.5 Hz - 8 kHz
Accuracy	±2 dB
Frequency	31.5 Hz - 8 kHz
Frequency measurement	A
Microphone type	1/2" Elektret condensor microphone
Visual alarm limits	>100 dB: display shows "HI" <100 dB: display shows "LO"
Temperature accuracy	±1.5 °C
Resolution	0.1
Display update	300 ms
Automatic switch-off	After 15 min. of inactivity (may be deactivated)
Power / Operating time	3x 1.5V AAA batteries / <60 h
Dimensions LxWxH	144 x 56 x 30.5 mm
Weight	73 g

BETEX 1600

Tachometer

Includes:

- Wind-noise suppressor

Type	BETEX 1600
Art. no.	610280
Measuring range laser-optical	2 - 99999 r.p.m.
Measuring range mechanical	2 - 20000 r.p.m.
Resolution	0.1 r.p.m. in 2.0 - 9999.9 r.p.m. range
Accuracy	± 0.05% of r.p.m. measuring value; ± 1 digit
Measuring distance	50 - 500 mm
Memory	10 readings
Power	1 x 9V battery / external power source 6V
Casing material	Robust ABS plastic
Display	LCD, 5 digits, 22 mm high
Dimensions LxWxH	160 x 60 x 42 mm
Weight	200 g

Monitoring

Stethoscope / Endoscope

BETEX ELS12

Electronic stethoscope / vibration checker

Includes:

- Stethoscope
- Headphones
- Sensor of 70 mm & 290 mm
- Case

Type	BETEX ELS 12
Art. no.	610320
Frequency range	100 Hz - 10 kHz
Volume	Adjustable
Operating temperature	-10 to +55 °C / 14 to 131 °F
Power	9V battery
Casing material	ABS
Dimensions LxWxH	206 x 50 x 32 mm
Needle sensor (screw-in)	1 x 290 mm; 1 x 70 mm (length)
Sensor material	Steel
Weight	240 g incl. battery

For preventive maintenance and machine repairs. Easily locate the source of mechanical noise in many machines.

Applications include the monitoring of the operating state of valves, injectors, electrical relays, pumps, lubrication systems, shafts, transmissions and bearings, etc.

BETEX Endoscope

Electronic videoscope

Includes:

- Card reader
- 8G SD card (expandable to 32GB)
- Case

Type	BETEX Endoscope
Art. no.	7803110
Probe diameter	6 mm
Pixels	690,000
Light intensity	20.000 lux
Storage capacity	8GB (expandable to 32GB)
Protection class	IP67 (probe) / IP55 (casing)
Interface	HDMI
File type	Photo: BMP, Video: MP4
Display	3,5" TFT daylight display (sunlight readable)
Weight	≤ 0.45 kg (incl. battery)

User-friendly videoscope suitable for detection, examination and preventive maintenance.

- Provides access to hard-to-reach spaces thanks to the 360-degree articulating tip, which is equipped with LED lighting.
- The probe is suitable for the toughest conditions.
- Its double insulation structure make it waterproof, and oil and corrosion resistant.
- Easy HDMI connection to a large screen, so external personnel can assess the test results properly.
- The endoscope is equipped with a magnetic handle.
- Easy one-hand operation.
- Simple user menu.

Monitoring

Bearing Checker Bearing condition meter

This easy in use, light weight instrument is used for fast, on-site condition assessment of all types of ball and roller bearings, in motors, gearboxes, pumps and fans. It is used for regular measurements at predefined positions and under similar operating conditions.

Timely detection of damaged bearings (heat or vibration) is important to improve machine reliability. The BearingChecker can also be used to identify lubrication and cavitation issues. Unplanned downtime and unnecessary repair work can be reduced by regular checking of a bearing condition.

This is the ideal instrument for beginners or a supplement to more advanced instruments for evaluated shock pulse measurement. It is easy to carry around on maintenance rounds. Afterwards, simply transfer measurement results to a file for further processing e.g. in Microsoft Excel.

The instrument measures shock pulse levels with an internal probe or external sensor/transducer. It can also be used as an electronic stethoscope for detecting machine sound irregularities.

- Ergonomic design, compact and lightweight
- Colour TFT LCD 2.4" display and push-button operation
- Measurement results can be transferred to e.g. Microsoft Excel
- Intuitive graphical user interface
- Protection class: IP65
- External or internal transducer
- Stethoscope function and connector for earphones (adaptor not included)

Complete system

- Bearing Checker
- USB cable
- Quick Start

Type	Bearing Checker
Art. no.	780302
Shock pulse measuring method	dBm/dBc, measuring range -9 to 90 dBsc, ±3 dBsv
Probe type	Integrated probe
Operating temperature	-10 to + 50°C / 14 to 122 °F
Resolution	1°C
Stethoscope	
Head phone mode	7 sound levels
Condition indication	Green, yellow and red LEDs
Measuring indication	Blue LED
General functionalities	Battery status display, probe line test, metric or imperial units, language-independent menus with symbols, memory for up to 10 readings
Protection class	IP65
Display	2.4" Color TFT LCD Display
Casing material	Copolyester/TPE
Power / Operating time	3.63V lithium-ion batteries or rechargeable USB, >25 hours of normal use
Dimensions LxWxH	207 x 74 x 41 mm
Weight	335 g

Available accessories

Monitoring

VibChecker Vibration meter

Vibrations are often the result of mechanical problems in industrial machines. When integrated into your normal maintenance activities, periodic vibration measurement with VibChecker will go a long way to help keep your equipment operational.

The VibChecker combines handiness and ease of use with affordability and durability. Suitable for both new and experienced users, the VibChecker covers the basic vibration monitoring needs in your maintenance activities.

- Lightweight and compact instrument for vibration measurement in a frequency range of 10-1000 Hz.
- Immediately following the measurement, the results are assessed automatically according to ISO standards.
- Green-yellow-red LEDs indicate the severity of the vibrations measured.
- A real-time FFT spectrum displays the vibration components for easy error pattern recognition.
- The results can be saved for subsequent reporting and follow-up.
- Built-in accelerometer.
- Convenient button operation and large display.
- Clear symbols.

Complete system

- VibChecker
- USB cable
- Quick Start

Type	VibChecker
Art. no.	780202
Frequency range	10 tot 1000 Hz
Readings	RMS / peak / peak-peak
Measuring range:	
- Speed	100 mm/s RMS (4 ips) @ 80 Hz
- Acceleration	100 m/s ² (10 g) @ 10-1000 Hz
- Displacement	100 µm (4 mil) @ 80 Hz
Condition evaluation	Vibration level according to ISO2372 and ISO10816, part 2,34 >600rpm
Spectrum	Linear, 200 lines, optical zoom, marking points
General functionalities	Battery status indicator, reading check, metric or imperial units, menus with symbols, memory for up to 10 readings
Condition indication	Green, yellow and red LEDs
Operating temperature	-10 to + 50°C / 14 to 122 °F
Display	2,4" colour TFT LCD
Casing material	Copolyester/TPE
Protection class	IP65
Power / Operating time	3.63V lithium-ion batteries or rechargeable USB, >25 hours of normal use
Dimensions LxWxH	207 x 74 x 41 mm
Weight	335 g

Custom made

Sometimes customisation is the best solution

Why custom-made?

Many customers already use our standard tools. But sometimes standard products are not enough. For example, if they want different dimensions or process parts that require special handling. In such cases, customised solutions are the answer. Our specialised R&D team is keen to think along with you.

From assessment to solution

A customised solution is specially developed in response to a problem in your production process. After all, specific problems require specific solutions. We always begin with a comprehensive analysis. We look at the total production process. This way, we can know exactly what you require.

We are committed to the project from beginning to end. From conception, engineering, and assembly, to the delivery. And afterwards, we are always stand-by for any advice and maintenance work.

Specialist for your customised products

A source of expertise. We have accumulated such knowledge since 1978. We are a specialist in maintenance and hydraulic tools for bearings and drive components.

Our knowledge of the international market results in a continuous development of people and products. We translate these new developments into our products. This enables us to apply the latest techniques to customised solutions.

Our custom-made products are found in all kinds of industries:

- Rail and metro
- Chemical industry
- Steel industry
- Paper industry
- Gearbox factories
- Mechanical engineering
- Transport sector
- MRO/OEM sector
- Wind power
- Power plants
- Mining industry

Custom made

Custom made hydraulic projects

Benefits of custom-made hydraulic projects

Customised products offer solutions for issues that cannot be solved with standard tools. Hydraulic custom work offers many advantages:

- ✓ More variety of solutions thanks to flexible use of hydraulics
- ✓ Size and tonnage as desired
- ✓ Hydraulic tools provide full control with simple and precise operation
- ✓ Controlled assembly and disassembly, no damage to (surrounding) workpieces
- ✓ Work safer and faster
- ✓ No noise pollution
- ✓ Custom-made solutions mean investments are sometimes lower than for standard products

Precise and safe

Instead of using heavy mechanical tools, hydraulics give you:

- Process control
- No excessive noise
- Safer workplace

Bogie Lifting Jack

This customised lifting jack is designed for maintenance and repair of bogies of trains, trams, and metros.

Between the rails 4 hydraulic lifting jacks are located. The jacks can be moved around in all directions. They allow a precise lifting and/or support of the part that needs service or repair.

- Lifting capacity: 14 tonnes
- Height and track width can both be easily adjusted

Assembly of wheel rims for metro and tram.

This hydraulic wheel rim press was developed to client specifications. The press is specially used to assemble wheel rims onto wheels, in combination with sound and vibration absorbing rubber blocks. These blocks are for travel comfort.

At assembly, a large cone is used to pull the wheel into the wheel rim hydraulically. The cone ensures that the rubber blocks are pressed together in a controlled manner, after which the wheel fits easily.

Objective: The wheel and wheel rim must align perfectly to prevent vibrations in the vehicle.

- 3 clamping arms
- Automatic centering
- Operation: from separate operating panel

BETEX HWS 150

This press is designed to customer specification. It is used for both installation and removal of wheels on the axle. It is also suitable for other parts like bearings, gears, and brake discs.

- Press force: 150 ton
- Stroke: 460 mm
- With press cylinders on both sides
- With 2 adapter jaws for dismounting when little space is available
- Positioning of wheel set with overhead crane
- Manual centring of the wheelset
- Flexible supports for positioning the wheelset
- Suitable for different wheel diameters or types of wheelsets
- Automatic storage of the force, distance, and speed of each press stroke. This data is downloadable

Custom made

Custom made induction projects

Advantages of custom induction heaters

Induction heaters are the ideal solution for safe heating of special parts or serial heating. In addition, induction heaters offer the following advantages:

- ✓ Can be used immediately, no preheating required
- ✓ Controlled heating, no loss of quality (Delta-T ΔT)
- ✓ Fast, safe, clean, stress-free heating
- ✓ Environmentally friendly and durable
- ✓ Capacities and designs to the client's requirements
- ✓ Low-frequency (50/60 Hz) and medium-frequency solutions

Fast and accurate heating

Induction heaters can be used immediately, preheating is not required. Local heating up to 300°C within seconds is possible. Users can work safely, cleanly and deliver high quality thanks to smart electronics. Whether it involves special parts or serial heating.

Whatever your requirements, induction heating enables you to achieve:

- ✓ A clean and safe workplace
- ✓ Improved productivity
- ✓ Lower production costs
- ✓ Efficient energy consumption

A clean and safe workplace

Instead of blow torches, ovens or oil baths, induction offers you:

- Process control
- No (open) flames
- No polluting fumes
- No excessive noise
- No hot oil

Safety first!

BETEX MF Quick-Heaters

With BETEX medium-frequency induction heaters, difficult dismantling and assembly jobs can be done safely and without damage. These are examples of projects with customised fixed inductors. Read more about the benefits of MF Quick-Heaters in Section "Medium-frequency technology" starting on page 4.

Elevator industry

Mounting of wheels in an elevator plant using pin inductors. For this client, custom inductors were made, with the required lengths and diameters.

Railway and metro industry

Inner rings, NU-NJ bearings and labyrinth rings are safely heated with fixed inductors. Thanks to the fast and balanced heating, they are removed safely, cleanly and without damage.

Paper industry

Custom-made inductors quickly heat up the inner rings of these paper rolls, allowing them to be removed without any problems. The new working method eliminated the need for the customer to outsource this work. Also it prevented damage to the workpiece and paper roll.

BETEX low-frequency induction heaters

These are examples of existing low-frequency heating devices that have been modified or completely customised for the customer. Read more about the benefits of induction heating in Section “Why use induction heating?” starting on page 6.

BETEX GIGANT

Adapted for heating train wheels. The induction yoke is extendable.

Temperature: 240°C
Time needed: 27 min.

BETEX GIGANT

Adapted for heating large stainless steel pipes (1100 kg), used in wind turbines.

Temperature: 270°C
Time needed: 3 hours

BETEX GIGANT

Adapted for heating rails.

Temperature: 250°C
Time needed: 7 min.

BETEX Twin Heater

For simultaneous heating of 2 bearings in the Railway industry.

Temperature: 110°C
Time needed: 4 min.

BETEX Coil heater

Thanks to this coil heater, the heating time of a train wheel was reduced from 40 minutes to 16 minutes. The outdated blow torches were discarded. This durable solution is safer, faster and offers complete control.

Temperature: 250°C
Time needed: 16 min.

BETEX Coil heater

Custom made Coil heaters can be used to quickly heat aluminium housings prior to mounting. The heater heats 5 different sizes.

Temperature: 250°C
Time needed: 30 sec. to 4 min.
